Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Surface and Marine Transport Section,
Transportation and Communications Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 996-9271) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, K1A 0T6.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des transports de surface et maritimes,
Division des transports et des communications,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 996-9271) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)
Montréal	(283-5725)	Regina	(359-5405)
Ottawa	(992-4734)	Edmonton	(420-3027)
Toronto	(966-6586)	Vancouver	(666-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
 - nil or zero.
- - amount too small to be expressed.
- P preliminary figures.
- † revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

An Explanation of abbreviations used through-out this report follows:

- N.E.S. — not elsewhere specified.
- C.L. — carload.
- L.C.L. — less than carload.
- T.O.F.C. — trailer on flat car.
- C.O.F.C. — container on flat car.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
 - néant ou zéro.
- - nombres infimes.
- P nombres provisoires.
- † nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTA

L'explication des abréviations employées dans le présent bulletin:

Introduction

General

Canadian railway history began with the opening for traffic of a 26 kilometre line between St. Jean and Laprairie, Quebec on July 21, 1836. This was only six years after the opening of the first railway in the world, the Liverpool and Manchester in England.

There were three great periods of railway construction in Canada, the 1850's when the Grand Trunk and the Great Western Railways were built; the 1870's and 1880's, when the Intercolonial and the Canadian Pacific Railways were built; and the 1900 to 1917 period which saw construction of the Grand Trunk Pacific, the National Transcontinental and the Canadian Northern.

In 1867, the colonies that came together in Canada's Confederation had some 4 023 kilometres of railway line.

The Canadian Pacific Railway, a joint stock company, was the first transcontinental system, having been completed in 1855. The Canadian National Railways, a name applied in 1918 to all government-owned and controlled lines, had its origin in Canada's first railway. The system embraces in addition to that pioneer line, numerous other railways and is the corporate successor to the Grand Trunk, the Intercolonial, the Canadian Northern, the National Transcontinental and the Grand Trunk Pacific Railways. It is the only railway now serving all ten provinces and the Northwest Territories.

Today, the Canadian National and Canadian Pacific Limited are engaged in country-wide transportation services and are the two main rail systems in Canada. Both operate a number of subsidiary services including hotels, telecommunications, express, highway transportation, steamships and airlines.

Statistics on railways have been collected and published in Canada since 1875; first by the Department of Railways and Canals until 1918 and by Statistics Canada since its inception in that year. Over this period of time the data have been published in varying degrees of detail. Until 1950 all annual data were contained in one volume. In 1951 there were three separate parts and from 1952 through 1957 there were five. Since 1958 six parts have been published in this series. Effective with

Introduction

Généralités

L'histoire des chemins de fer canadiens remonte au 21 juillet 1836 avec l'ouverture d'une ligne de 26 kilomètres entre St. Jean et Laprairie, au Québec. Cet événement survenait six ans seulement après la mise en service du premier chemin de fer du monde, le *Liverpool and Manchester* d'Angleterre.

On a assisté à trois grandes périodes de construction de chemins de fer au Canada: les années 1850 marquèrent l'avènement du Grand-Tronc et de la *Great Western Railways*; puis dans les années 1870 et 1880, ce fut le chemin de fer Intercolonial et le Canadien Pacifique; enfin dans la période de 1900 à 1917, on construisit le Grand-Tronc-Pacifique, le National Transcontinental et le Canadien-Nord.

En 1867, les colonies qui formèrent la Confédération canadienne disposaient de quelque 4 023 kilomètres de voies ferrées.

Le Canadien Pacifique, une société par actions, a été le premier réseau transcontinental, ayant été achevé en 1855. Les Chemins de fer Nationaux du Canada (Canadien National), nom donné en 1918 à toutes les lignes possédées et contrôlées par l'État, tirent leurs origines du premier chemin de fer canadien. Outre cette première ligne le réseau comprend de nombreux autres chemins de fer et constitue le successeur du Grand-Tronc, de l'Intercolonial, du Canadien-Nord, du National Transcontinental et du Grand-Tronc-Pacifique. C'est le seul chemin de fer à desservir actuellement les dix provinces et les Territoires du Nord-Ouest.

Aujourd'hui, le Canadien National et le Canadien Pacifique exploitent un service de transport à l'échelle du pays et forment les deux principaux systèmes ferroviaires au Canada. Ils offrent également un certain nombre de services complémentaires dans les domaines de l'hôtellerie, des télécommunications, des messageries et du transport routier, maritime et aérien.

Les statistiques sur les chemins de fer ont été recueillies et publiées au Canada depuis 1875, tout d'abord par le ministère des Chemins de fer et Canaux jusqu'en 1918, puis par le Bureau fédéral de la statistique (maintenant Statistique Canada) depuis sa création en 1918. Pendant cette période, les données ont paru d'une manière plus ou moins détaillée. Jusqu'en 1950, les statistiques annuelles faisant l'objet d'un seul volume. En 1951, on comptait trois publications et de 1952 à 1957, il y en avait cinq. Depuis 1958, la série comprend six publications. À partir de

this Edition the data are presented in four separate publications.

A complete list of all titles published in this field is located at the end of this annual report.

Annual statistics of railways in Canada are compiled by the Transportation and Communications Division of Statistics Canada from returns made in accordance with the provisions of the Railway Act and the Statistics Act. The returns are certified as being correct by the comptrollers or other senior officers of the companies.

Published railway transport information is intended to serve a wide variety of purposes chief among which are:

to aid in the planning and formulation of national and regional transportation policy;

to furnish details useful in the administration and regulation of railway carriers;

to provide a basis for description and analysis of this sector of the economy;

to provide inputs into national statistical aggregates, such as the Gross National Product for use in the formation of Canada's economic policy.

Coverage and Methodology

Presented in this publication are revenue freight traffic statistics as reported by the 21 common carrier railways operating in Canada which handle such traffic. Statistical information concerning the White Pass and Yukon Route railway was not obtainable in time for this publication.

Effective 1981 Northern Alberta data was incorporated with Canadian National data but not in previous years where it was under the class II category.

Commodity detail is shown for 320 classes of freight which have been derived from the Standard Commodity Classification (SCC) of Statistics Canada. The SCC is the basis for the commodity series published on water and road transport, imports, exports, manufacturing materials used and shipments.

Data relative to nine larger railways normally having gross operating revenues of \$10 million or more annually are shown individually. Statistics for the remaining railways are grouped under "all other" Class II within the respective accounting classes as defined in the latest version of the Canadian Transport Commission's Uniform Classification of Accounts.

Railway companies within the legislative authority of the Parliament of Canada are classified as follows:

la présente édition les données sont présentées à l'intérieur de quatre publications.

La liste complète figure à la fin de cette publication annuelle.

Les statistiques annuelles du transport ferroviaire au Canada sont rassemblées par la Division des transports et des communications de Statistique Canada d'après les déclarations produites conformément aux dispositions de la Loi sur les chemins de fer et de la Loi sur la statistique. La justesse des déclarations est certifiée par les contrôleurs ou autres cadres des sociétés.

La publication de renseignements sur le transport ferroviaire entend servir diverses fins, notamment:

favoriser la planification et la formulation d'une politique des transports à l'échelle nationale et régionale;

fournir des renseignements détaillés utiles à l'administration et à la réglementation des chemins de fer;

offrir une base pour la description et l'analyse de ce secteur de l'économie;

fournir un apport aux agrégats statistiques au niveau national, comme le produit national brut, pour aider à formuler la politique économique du Canada.

Champ de l'enquête et méthodologie

Cette publication présente les statistiques sur le trafic des marchandises payantes communiquées par les 21 transporteurs ferroviaires publics en activité au Canada qui manutentionnent un tel trafic. Les données de la White Pass and Yukon Route n'étaient pas disponibles lors de l'impression de cette publication.

À partir de 1981, les données de la Northern Alberta, une compagnie de classe II, sont comprises dans celles du Canadien National mais elles ne l'étaient pas les années antérieures.

Des statistiques détaillées y figurent pour 320 classes de marchandises tirées de la Classification type des produits (CTP) publiée par Statistique Canada. La CTP constitue la base de la série sur les marchandises concernant le transport par eau et le transport routier, les importations, les exportations, les matières utilisées dans la fabrication et les livraisons.

Les données relatives aux neuf principales sociétés de transport ferroviaire qui ont normalement des recettes d'exploitation brutes de \$10 millions ou plus par année sont présentées séparément. Les statistiques se rapportant aux autres sociétés ferroviaires sont groupées sous la rubrique "Tous autres" classe II conformément aux classes comptables respectives telles que définies dans la plus récente version de la Classification uniforme des comptes de la Commission canadienne des transports.

Les compagnies de chemin de fer relevant de l'autorité législative du Parlement canadien sont classées comme suit:

Class I - Canadian National Railways, Canadian Pacific Limited and VIA Rail Canada Inc., and their related operations which are defined herein as "Canadian Rail".

Class II - Other carriers involved in Canadian rail transportation operations.

Class III - Other companies which report under the **Railway Act**, such as terminal, bridge and tunnel companies.

Freight interchanged between railways operating in Canada is shown in this report. These movements are included in the totals for individual companies but are excluded in the grand totals for all railways to avoid duplication.

Quality and Data Limitations

The total volume of freight carried as shown herein does not take into account traffic handled in intermediate switching services. The latter, involving less than 1% of all tonnage, is included in the (metric tonnes carried) figure which appears in Table 16 (Catalogue 52-215). Consequently, the two totals differ to that extent.

With respect to piggyback freight, the figures reported include only that traffic wherein a shipper submitted a trailer or container as such, for shipment by rail. Not included under this heading are goods submitted by the shipper as loose merchandise which the railways chose to move in a railway-owned container or trailer on a flat car as opposed to, say a box car. The latter freight is included with various other commodity groups according to the nature of the merchandise involved.

Data appearing in this publication have been edited and compiled using a computer system from hand-produced and computer-generated returns submitted by the carriers. These statistics are not normally subject to change.

In undertaking long-term analysis of rail freight commodity data using this series (Catalogue 52-211) it should be noted that changes in the classification structure and in reporting practices occurred in 1970. In that year the present 320-item commodity system was introduced and certain railways switched from a "received" to a "forwarded" basis of reporting these data. A more detailed explanation of the effects of these changes on the statistics appeared in the 1970 issue of this publication.

Concepts and Definitions

Railways serving both Canadian and United States points treat the American portion of their lines as a United

Catégorie I - Le Canadien National, le Canadien Pacifique, VIA Rail Canada Inc. et leurs opérations qui sont définies ici comme les opérations des "chemins de fer canadiens".

Catégorie II - Les autres transporteurs participant aux opérations de transport des chemins de fer canadiens.

Catégorie III - Les autres compagnies qui relèvent directement de la **Loi sur les chemins de fer** comme celles qui exploitent des gares, des ponts et des tunnels.

Cette publication tient compte des marchandises acheminées par plus d'une société ferroviaire au Canada. Ces mouvements sont compris dans les totaux de chaque société ferroviaire, mais ne figurent pas dans le total général pour toutes les sociétés ferroviaires afin d'éviter tout double compte.

Qualité et limites des données

Le volume total de marchandises transportées, indiqué ici ne tient pas compte du trafic faisant l'objet de raccordements assurés par des services intermédiaires. Ces services, transportant moins de 1% du tonnage, sont inclus dans le chiffre des (tonnes métriques transportées) qui figure dans le tableau 16 (n^o 52-215 au catalogue). En conséquence, ces deux chiffres diffèrent jusqu'à un certain point.

En ce qui concerne le trafic rail-route, les chiffres de la présente publication ne portent que sur le trafic pour lequel un expéditeur fait demande de livraison par voie ferrée d'une remorque ou d'un conteneur comme tel. Ne sont pas comprises sous cette rubrique les marchandises qui sont envoyées en vrac par l'expéditeur et que la société ferroviaire choisit de transporter dans un conteneur ou une remorque qui lui appartient, sur un wagon plat plutôt que dans un wagon couvert, par exemple. Ce genre de trafic est compris dans divers autres groupes de produits selon la nature de la marchandise transportée.

Les données de la présente publication ont été vérifiées et calculées à partir de déclarations remplies à la main et par ordinateur par les transporteurs. Ces statistiques ne font pas normalement l'objet de variations.

Si le lecteur désire effectuer une analyse à long terme des données sur les marchandises par chemin de fer à l'aide de cette série (n^o 52-211 au catalogue), il vaudra bien prendre note qu'on a modifié la structure de la classification et les méthodes de déclaration en 1970. C'est cette année-là que le système de 320 classes de marchandises a été établi et que certaines entreprises ferroviaires ont commencé à déclarer des données sur les marchandises "livrées" plutôt que sur les marchandises "reçues". Une explication plus détaillée des effets de ces modifications sur les statistiques figure dans l'édition de 1970 de la présente publication.

Concepts et définitions

Aux fins des tableaux, les sociétés ferroviaire qui desservent des localités au Canada et aux États-Unis considèrent la partie

States rail connection for the purpose of these tabulations. Thus freight crossing the International Boundary, whether from or to a non-reporting United States railroad at that point, or carried by one of the respondents reporting in this series, appears as a receipt from or a delivery to a United States rail connection. Certain extensions of Canadian National and Canadian Pacific rail services in the United States (116 kilometres and 520 kilometres respectively, in 1981) are, for statistical purposes, considered part of the Canadian operations and included herein. These mileages include, for the most part, overhead movements (Canada to Canada through the United States) and short rail extensions across the border to connecting United States carriers.

The terms used in the columnar headings throughout this publication reflect the following instructions to the railways.

“Loaded” means: revenue freight originated directly on the road of the respondent, including that received from private, non-reporting industrial sidings; freight received from switching roads connecting with the respondent where such freight has not previously been given line haul transportation; freight received from other modes of transport; freight re-shipped following milling or fabrication at some point in transit; and idler or trailer cars.

“Received from other railways in Canada” means: traffic received directly from connecting Canadian rail carriers and receipts from other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a previous rail haul is indicated.

“Received from United States rail destined to Canadian points” means: traffic received from United States rail connections, or transported across the border by the respondent, destined to Canadian points.

“Received from United States rail destined to United States points” means: freight moving from United States rail connections to points in the United States (overhead traffic).

“Unloaded” means: freight terminated directly on the road of the respondent, including that delivered to private, non-reporting industrial sidings and grain unloaded at interior, lake and coastal elevators for export; freight delivered to switching roads connecting with the respondent where there is no further line haul; freight delivered to other modes of transport; and freight unloaded for milling or fabrication at some point in transit.

“Delivered to other railways in Canada” means: traffic delivered directly to connecting Canadian rail carriers and deliveries to other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a subsequent rail haul is indicated.

située aux États-Unis comme faisant partie de ce pays. Ainsi, une marchandise qui traverse la frontière internationale, en provenance ou à destination d'un chemin de fer américain non enquêté à cet endroit ou une marchandise transportée par l'un des enquêtés est inscrite comme une marchandise en provenance ou à destination d'un raccordement aux États-Unis. Certains prolongements du Canadien National et du Canadien Pacifique aux États-Unis (116 kilomètres et 520 kilomètres respectivement en 1981) sont considérés comme canadiens à des fins statistiques et sont inclus dans cette publication. Dans la majorité des cas, il s'agit de mouvements intermédiaires (du Canada au Canada en passant par les États-Unis) et de courts prolongements ferroviaires de l'autre côté de la frontière raccordés à des transporteurs américains.

Les expressions utilisées dans les en-têtes de la présente publication proviennent des directives suivantes adressées aux sociétés ferroviaires.

“Chargées” signifie: transport commercial de marchandises effectué directement sur une ligne de l'enquête, y compris les marchandises provenant d'embranchements privés non enquêtés; marchandises provenant de voies d'aiguillage reliées à celle de l'enquête lorsque les marchandises n'ont pas déjà fait l'objet d'un transport proprement dit; marchandises provenant d'autres modes de transport; marchandises réexpédiées après usinage ou transformation en cours de route; et wagons-allonges.

“Provenant d'autres sociétés ferroviaires du Canada” signifie: marchandises provenant directement de raccordements ferroviaires canadiens et provenant d'autres modes de transport (autres que les traversiers d'automobiles), lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un transport ferroviaire antérieur est indiqué.

“Provenant de voies des États-Unis et destinées à des localités canadiennes” signifie: marchandises, provenant de raccordements ferroviaires américains ou transportées de ce côté-ci de la frontière par l'enquête et destinées à des localités canadiennes.

“Provenant de voies des États-Unis et destinées à des localités américaines” signifie: marchandises passant de raccordements ferroviaires des États-Unis à des localités des États-Unis (trafic intermédiaire).

“Déchargées” signifie: marchandises livrées directement à partir d'une ligne de l'enquête, y compris celles livrées à des embranchements privés non enquêtés et les céréales déchargées à des élévateurs intérieurs, à des élévateurs sur les lacs et sur la côte en vue de l'exportation; marchandises livrées à des voies d'aiguillage reliées à celles de l'enquête au point où à partir duquel plus aucun transport n'a eu lieu; marchandises livrées à d'autres modes de transport; et marchandises déchargées en vue de la transformation ou de l'usinage en cours de route.

“Livrées à des chemins de fer du Canada” signifie: marchandises livrées directement à des raccordements ferroviaires du Canada et marchandises livrées à d'autres modes de transport (autres que les traversiers d'automobiles) lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un autre transport ferroviaire subséquent est indiqué.

"Delivered to United States rail" means: traffic delivered to United States rail connections or transported across the border by the respondent; and deliveries to United States rail connections of freight originated in the United States and moved overhead through Canada.

A "common carrier" refers to a railway which holds itself out to the general public to transport goods and/or passengers for compensation.

"Intermediate switching" is a switching service which includes all the elements of switching performed by a carrier which neither originates or terminates the shipment nor receives a line haul on that shipment.

To eliminate duplicate reporting and to uncover statistical gaps, Statistics Canada uses the Canadian *Standard Industrial Classification Manual* (SIC) which provides a set of groups and classes suitable for the compilation of statistics related to different industries. The building block (reporting unit) which fits into the above structure is the "establishment". An establishment can be defined as the smallest unit which is a separate operating entity capable of reporting principal elements of input and output. While the establishment is typically a factory, mine, store or similar unit and in most cases is a separate firm it may encompass two or more operating units which are not necessarily in the same location. It can also be an individual working on his own account.

Industry 503, Railway Transport, as classified in the SIC includes establishments primarily engaged in operating railways. The kinds of activities normally carried on by railway establishments embraces the operation of railway freight and passenger trains, commuter service (but not street railways), maintenance of way and structures, maintenance of equipment (including that carried on in railway shops), dining car and sleeping car services, express and the operation of railway terminal facilities. Road transportation services operated by railway establishments and providing pick-up and delivery for the freight or express services of the railway are included in this industry but long-distance trucking operations owned by railway companies are usually set up as separate establishments classified to the trucking industry, except CN express. For reporting purposes, only railways classified as "common carriers" by the Canadian Transport Commission file annual reports under Section 325 of the Railway Act 1970 jointly to the Canadian Transport Commission and Statistics Canada.

Statistical Highlights

Revenue freight traffic handled by railways in Canada in 1982 totalled 212.8 million tonnes, down 13.8% from 1981. Domestic loadings decreased 13.3% to 199.6 million tonnes while receipts from U.S. connections decreased by 20.8% to 13.2 million tonnes.

"Livrées à des chemins de fer des États-Unis" signifie: marchandises livrées à des raccordements ferroviaires des États-Unis ou transportées au-delà de la frontière par l'enquête; et livraisons à des raccordements ferroviaires des États-Unis de marchandises provenant des États-Unis et passant par le Canada.

Une "société ferroviaire de transport public" désigne toute entreprise ferroviaire qui offre au grand public un service de transport de marchandises et (ou) de passagers contre rétribution.

Le "raccordement intermédiaire" est un service de raccordement qui comprend toutes les activités de raccordement exercées par un transporteur autre que le premier ou le dernier transporteur et qui ne s'occupe pas du transport interurbain de cette marchandise.

Afin d'éviter qu'il y ait double déclaration et de découvrir les lacunes statistiques, Statistique Canada utilise la *Classification des activités économiques* (CAÉ) qui fournit des groupes et des classes convenant au calcul de statistiques portant sur diverses activités économiques. Le groupe (unité déclarante) que l'on insère dans la structure ci-dessus est l'"établissement". Un établissement peut se définir comme la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer les éléments utilisés et produits. L'établissement est généralement une usine, une mine, un magasin ou une unité semblable et la plupart du temps une entreprise séparée, mais il peut englober deux unités ou plus qui ne sont pas nécessairement au même endroit. Il peut aussi s'agir d'une personne travaillant à son propre compte.

L'activité économique 503, Transports ferroviaires, comprend, selon la CAÉ, les établissements dont l'activité principale est l'exploitation de chemins de fer. Les activités habituelles de ces établissements ferroviaires comprennent le transport de passagers et de marchandises, les services aux banlieues (à l'exception des chemins de fer urbains et des tramways), l'entretien de la voie et des ouvrages, l'entretien du matériel (y compris le travail effectué dans les ateliers des chemins de fer), les services de wagons-restaurants et de wagons-lits, les services de messageries et l'exploitation de terminus ferroviaires. Les services de transport routier exploités par des établissements ferroviaires et fournissant des services de ramassage et de livraison de marchandises ou les services de messageries des chemins de fer sont inclus dans cette activité économique. Toutefois, le camionnage interurbain effectué par des sociétés ferroviaires constitue habituellement un établissement séparé, classé avec le camionnage, sauf les messageries CN. À des fins de déclaration, seulement les chemins de fer que la Commission canadienne des transports classe sous la rubrique "société ferroviaire de transport public" présentent des déclarations annuelles conjointement à la Commission et à Statistique Canada en vertu de l'article 325 de la Loi de 1970 sur les chemins de fer.

Points saillants

Les marchandises payantes transportées par chemin de fer au Canada en 1982 ont totalisé 212.8 millions de tonnes métriques, soit une baisse de 13.8% sur 1981. Les chargements au Canada ont diminué de 13.3% pour se chiffrer à 199.6 millions de tonnes métriques, tandis que le volume des marchandises en provenance des lignes américaines a connu une baisse de 20.8% pour s'établir à 13.2 millions de tonnes métriques.

TABEAU 1. Marchandises payantes transportées par chemin de fer au Canada - Sommaire, 1982

Total freight traffic(1) (initial haul), 1982	Unloaded from railway cars	Delivered to other railways	Delivered to United States rail	Type de marchandise	No
Total du trafic de marchandises(1) (transport initial), 1982	Déchargées du wagon	Remises aux autres chemins de fer	Remises au réseau des États-Unis		
metric - tonnes - métriques					
SECTION II:					
Denrées alimentaires, aliments pour animaux, boissons et tabacs (charge complète):					
37 593	33 163	7 501	4 790	Aliments d'origine animale pour animaux	140
1 893	1 622	19	297	Aliments concentrés pour animaux	142
137 081	87 879	17 761	56 723	Aliments complets pour animaux, n.d.a.	144
5 729	5 732	124	-	Boissons non alcooliques	146
61 064	50 276	385	10 404	Ale, bière, stout et porter	148
34 935	5 946	552	28 981	Vins et boissons alcooliques fermentées, n.d.a.	150
41 426	11 634	5 639	32 747	Boissons alcooliques distillées	152
27	-	-	-	Cigarettes	154
-	-	-	-	Tabacs bruts	156
473	474	-	-	Tabacs fabriqués, n.d.a.	158
39 591 478	37 644 583	2 217 933	1 399 359	Total	992
SECTION III:					
Matières brutes, non comestibles (charge complète):					
9 779	8 024	502	1 253	Cuir et peaux bruts (y compris les pelleteries)	160
21 664	12 926	3 424	8 711	Déchets d'abattoir non conditionnés	162
1 609	1 348	408	34	Produits bruts d'origine animale, non comestibles, n.d.a. (sauf les fibres)	164
39 548	30 403	3 213	8 841	Semences, n.d.a.	166
395 534	389 376	3 365	4 343	Lin	168
1 507 420	1 519 181	29 823	34	Colza	170
30 637	30 570	-	68	Soja	172
70 727	66 336	6 734	5 072	Graines oléagineuses, noix oléagineuses et amandes oléagineuses, n.d.a.	174
43 899	43 474	30 094	940	Caoutchouc et gommes analogues	176
23 112	1 578	3 710	18 184	Tourbe et autres mousses, n.d.a.	178
9 555	8 877	1 068	124	Autres matières brutes d'origine végétale, non comestibles, n.d.a.	180
1 017 541	1 017 414	4 311	27	Billes et billots de bois	182
8 771	6 558	2 624	1 028	Piquets de clôture, étais de mine et pilots en bois	184
117 321	97 700	19 239	22 239	Bois en grume, n.d.a.	186

(1) Comprend l'ensemble du trafic marchandises effectué par chaque société ferroviaire individuelle. Les marchandises provenant d'autres sociétés ferroviaires du Canada seront ainsi également incluses dans les totaux pour une société ferroviaire ou plus.

(2) Non compris les remorques et conteneurs qui sont la propriété des compagnies ferroviaires (plan II) et dont le fret a été classé par type de marchandise suivant le contenu de la remorque ou conteneur.

AVAILABLE PUBLICATIONS

Publications produced by the Transportation and Communications Division dealing with Railway Transport Statistics.

Catalogue

Periodical

- 52-001 Railway Carloadings (Monthly), Bil.
Cars and tonnes of revenue freight loaded in Eastern and Western Canada, by 70 commodities.
- 52-003 Railway Operating Statistics (Monthly), Bil.
Financial, traffic and operating statistics of railways in Canada.
- 52-004 Railway Transport Service Bulletin (Occasional), Bil.
Summary releases in advance of regular publications and results of special studies.

Annual

- 52-205 Railway Freight Traffic, Bil.
Revenue freight carried in Canada, by province and region with details for more than 300 commodities.
- 52-207 Railway Transport: Part I, Bil. (Last issue 1981)
Comparative summary statistics — latest five years. Includes accident statistics.
- 52-208 Railway Transport: Part II, Bil. (Last issue 1981)
Financial Statistics.
- 52-209 Railway Transport: Part III, Bil. (Last issue 1981)
Equipment, track and fuel statistics.
- 52-210 Railway Transport: Part IV, Bil. (Last issue 1981)
Operating and traffic statistics.
- 52-211 Railway Transport in Canada — Commodity Statistics, Bil. formerly called: Railway Transport, Part V.
Freight carried by principal commodity classes.
- 52-212 Railway Transport: Part VI, Bil. (Last issue 1981)

CHOIX DE PUBLICATIONS

Publications produites par la Division de transports et des communications sur la statistique du transport ferroviaire.

Catalogue

Périodiques

- 52-001 Chargements ferroviaires (mensuel), Bil.
Nombre de wagons chargés et volume du fret payant chargé dans l'est et l'ouest du Canada, pour 70 produits.
- 52-003 Statistique de l'exploitation ferroviaire (mensuel), Bil.
Statistiques des finances, du trafic et de l'exploitation des transporteurs ferroviaires du Canada.
- 52-004 Bulletin de service sur le transport par rail (hors série), Bil.
Communiqués paraissant avant la publication des bulletins réguliers et résultats d'études spéciales.

Annuelles

- 52-205 Trafic-marchandises ferroviaire. Bil.
Fret payant transporté par province et région, avec détails pour plus de 300 produits.
- 52-207 Transport ferroviaire: Partie I, Bil. (Dernière édition 1981)
Résumé comparatif des statistiques — cinq dernières années. Statistiques des accidents.
- 52-208 Transport ferroviaire: Partie II, Bil. (Dernière édition 1981)
Statistiques de la situation financière.
- 52-209 Transport ferroviaire: Partie III, Bil. (Dernière édition 1981)
Statistiques du matériel, des voies et du carburant.
- 52-210 Transport ferroviaire: Partie IV, Bil. (Dernière édition 1981)
Statistiques de l'exploitation et du trafic.
- 52-211 Transport ferroviaire du Canada — Statistiques sur les marchandises, Bil. autrefois appelée: Transport ferroviaire: Partie V Bil.
Marchandises transportées, par grands groupes de produits.
- 52-212 Transport ferroviaire: Partie VI, Bil. (Dernière édition 1981)

Data in Many Forms . . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Surface and Marine Transport Section,
Transportation and Communications Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-8693) or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)
Halifax	(426-5331)	Winnipeg	(949-4020)

How to Order Publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, K1A 0T6.

Des données sous plusieurs formes . . .

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinarlingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des transports de surface et maritimes,
Division des transports et des communications,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-8693) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Sturgeon Falls	(753-4888)

Introduction

General

Canadian railway history began with the opening for traffic of a 26 kilometre line between St. Jean and Laprairie, Quebec on July 21, 1836. This was only six years after the opening of the first railway in the world, the Liverpool and Manchester in England.

There were three great periods of railway construction in Canada, the 1850's when the Grand Trunk and the Great Western Railways were built; the 1870's and 1880's, when the Intercolonial and the Canadian Pacific Railways were built; and the 1900 to 1917 period which saw construction of the Grand Trunk Pacific, the National Transcontinental and the Canadian Northern.

In 1867, the colonies that came together in Canada's Confederation had some 4 023 kilometres of railway line.

The Canadian Pacific Railway, a joint stock company, was the first transcontinental system, having been completed in 1855. The Canadian National Railways, a name applied in 1918 to all government-owned and controlled lines, had its origin in Canada's first railway. The system embraces in addition to that pioneer line, numerous other railways and is the corporate successor to the Grand Trunk, the Intercolonial, the Canadian Northern, the National Transcontinental and the Grand Trunk Pacific Railways. It is the only railway now serving all ten provinces and the Northwest Territories.

Today, the Canadian National and Canadian Pacific Limited are engaged in country-wide transportation services and are the two main rail systems in Canada. Both operate a number of subsidiary services including hotels, telecommunications, express, highway transportation, steamships and airlines.

Statistics on railways have been collected and published in Canada since 1875; first by the Department of Railways and Canals until 1918 and by Statistics Canada since its inception in that year. Over this period of time the data have been published in varying degrees of detail. Until 1950 all annual data were contained in one volume. In 1951 there were three separate parts and from 1952 through 1957 there were five. Since 1958 six parts have been published in this series. Effective with

Introduction

Généralités

L'histoire des chemins de fer canadiens remonte au 21 juillet 1836 avec l'ouverture d'une ligne de 26 kilomètres entre St. Jean et Laprairie, au Québec. Cet événement survenait six ans seulement après la mise en service du premier chemin de fer du monde, le *Liverpool and Manchester* d'Angleterre.

On a assisté à trois grandes périodes de construction de chemins de fer au Canada: les années 1850 marquèrent l'avènement du Grand-Tronc et de la *Great Western Railways*; puis dans les années 1870 et 1880, ce fut le chemin de fer Intercolonial et le Canadien Pacifique; enfin dans la période de 1900 à 1917, on construisit le Grand-Tronc-Pacifique, le National Transcontinental et le Canadien-Nord.

En 1867, les colonies qui formèrent la Confédération canadienne disposaient de quelque 4 023 kilomètres de voies ferrées.

Le Canadien Pacifique, une société par actions, a été le premier réseau transcontinental, ayant été achevé en 1855. Les Chemins de fer Nationaux du Canada (Canadien National), nom donné en 1918 à toutes les lignes possédées et contrôlées par l'État, tirent leurs origines du premier chemin de fer canadien. Outre cette première ligne le réseau comprend de nombreux autres chemins de fer et constitue le successeur du Grand-Tronc, de l'Intercolonial, du Canadien-Nord, du National Transcontinental et du Grand-Tronc-Pacifique. C'est le seul chemin de fer à desservir actuellement les dix provinces et les Territoires du Nord-Ouest.

Aujourd'hui, le Canadien National et le Canadien Pacifique exploitent un service de transport à l'échelle du pays et forment les deux principaux systèmes ferroviaires au Canada. Ils offrent également un certain nombre de services complémentaires dans les domaines de l'hôtellerie, des télécommunications, des messageries et du transport routier, maritime et aérien.

Les statistiques sur les chemins de fer ont été recueillies et publiées au Canada depuis 1875, tout d'abord par le ministère des Chemins de fer et Canaux jusqu'en 1918, puis par le Bureau fédéral de la statistique (maintenant Statistique Canada) depuis sa création en 1918. Pendant cette période, les données ont paru d'une manière plus ou moins détaillée. Jusqu'en 1950, les statistiques annuelles faisant l'objet d'un seul volume. En 1951, on comptait trois publications et de 1952 à 1957, il y en avait cinq. Depuis 1958, la série comprend six publications. À partir de

this Edition the data are presented in four separate publications.

A complete list of all titles published in this field is located at the end of this annual report.

Annual statistics of railways in Canada are compiled by the Transportation and Communications Division of Statistics Canada from returns made in accordance with the provisions of the Railway Act and the Statistics Act. The returns are certified as being correct by the comptrollers or other senior officers of the companies.

Published railway transport information is intended to serve a wide variety of purposes chief among which are:

to aid in the planning and formulation of national and regional transportation policy;

to furnish details useful in the administration and regulation of railway carriers;

to provide a basis for description and analysis of this sector of the economy;

to provide inputs into national statistical aggregates, such as the Gross National Product for use in the formation of Canada's economic policy.

Coverage and Methodology

Presented in this publication are revenue freight traffic statistics as reported by the 22 common carrier railways operating in Canada which handle such traffic. Statistical information concerning the White Pass and Yukon Route railway was not obtainable in time for this publication.

Effective 1981 Northern Alberta data was incorporated with Canadian National data but not in previous years where it was under the class II category.

Commodity detail is shown for 320 classes of freight which have been derived from the Standard Commodity Classification (SCC) of Statistics Canada. The SCC is the basis for the commodity series published on water and road transport, imports, exports, manufacturing materials used and shipments.

Data relative to nine larger railways normally having gross operating revenues of \$10 million or more annually are shown individually. Statistics for the remaining railways are grouped under "all other" Class II within the respective accounting classes as defined in the latest version of the Canadian Transport Commission's Uniform Classification of Accounts.

Railway companies within the legislative authority of the Parliament of Canada are classified as follows:

la présente édition les données sont présentées à l'intérieur de quatre publications.

La liste complète figure à la fin de cette publication annuelle.

Les statistiques annuelles du transport ferroviaire au Canada sont rassemblées par la Division des transports et des communications de Statistique Canada d'après les déclarations produites conformément aux dispositions de la Loi sur les chemins de fer et de la Loi sur la statistique. La justesse des déclarations est certifiée par les contrôleurs ou autres cadres des sociétés.

La publication de renseignements sur le transport ferroviaire entend servir diverses fins, notamment:

favoriser la planification et la formulation d'une politique des transports à l'échelle nationale et régionale;

fournir des renseignements détaillés utiles à l'administration et à la réglementation des chemins de fer;

offrir une base pour la description et l'analyse de ce secteur de l'économie;

fournir un apport aux agrégats statistiques au niveau national, comme le produit national brut, pour aider à formuler la politique économique du Canada.

Champ de l'enquête et méthodologie

Cette publication présente les statistiques sur le trafic des marchandises payantes communiquées par les 22 transporteurs ferroviaires publics en activité au Canada qui manutentionnent un tel trafic. Les données de la White Pass and Yukon Route n'étaient pas disponibles lors de l'impression de cette publication.

À partir de 1981, les données de la Northern Alberta, une compagnie de classe II, sont comprises dans celles du Canadien National mais elles ne l'étaient pas les années antérieures.

Des statistiques détaillées y figurent pour 320 classes de marchandises tirées de la Classification type des produits (CTP) publiée par Statistique Canada. La CTP constitue la base de la série sur les marchandises concernant le transport par eau et le transport routier, les importations, les exportations, les matières utilisées dans la fabrication et les livraisons.

Les données relatives aux neuf principales sociétés de transport ferroviaire qui ont normalement des recettes d'exploitation brutes de \$10 millions ou plus par année sont présentées séparément. Les statistiques se rapportant aux autres sociétés ferroviaires sont groupées sous la rubrique "Tous autres" classe II conformément aux classes comptables respectives telles que définies dans la plus récente version de la Classification uniforme des comptes de la Commission canadienne des transports.

Les compagnies de chemin de fer relevant de l'autorité législative du Parlement canadien sont classées comme suit:

Class I - Canadian National Railways, Canadian Pacific Limited and VIA Rail Canada Inc., and their related operations which are defined herein as "Canadian Rail".

Class II - Other carriers involved in Canadian rail transportation operations.

Class III - Other companies which report under the **Railway Act**, such as terminal, bridge and tunnel companies.

Freight interchanged between railways operating in Canada is shown in this report. These movements are included in the totals for individual companies but are excluded in the grand totals for all railways to avoid duplication.

Quality and Data Limitations

The total volume of freight carried as shown herein does not take into account traffic handled in intermediate switching services. The latter, involving less than 1% of all tonnage, is included in the (metric tonnes carried) figure which appears in Table 16 (Catalogue 52-215). Consequently, the two totals differ to that extent.

With respect to piggyback freight, the figures reported include only that traffic wherein a shipper submitted a trailer or container as such, for shipment by rail. Not included under this heading are goods submitted by the shipper as loose merchandise which the railways chose to move in a railway-owned container or trailer on a flat car as opposed to, say a box car. The latter freight is included with various other commodity groups according to the nature of the merchandise involved.

Data appearing in this publication have been edited and compiled using a computer system from hand-produced and computer-generated returns submitted by the carriers. These statistics are not normally subject to change.

In undertaking long-term analysis of rail freight commodity data using this series (Catalogue 52-211) it should be noted that changes in the classification structure and in reporting practices occurred in 1970. In that year the present 320-item commodity system was introduced and certain railways switched from a "received" to a "forwarded" basis of reporting these data. A more detailed explanation of the effects of these changes on the statistics appeared in the 1970 issue of this publication.

Concepts and Definitions

Railways serving both Canadian and United States points treat the American portion of their lines as a United

Catégorie I - Le Canadien National, le Canadien Pacifique, VIA Rail Canada Inc. et leurs opérations qui sont définies ici comme les opérations des "chemins de fer canadiens".

Catégorie II - Les autres transporteurs participant aux opérations de transport des chemins de fer canadiens.

Catégorie III - Les autres compagnies qui relèvent directement de la **Loi sur les chemins de fer** comme celles qui exploitent des gares, des ponts et des tunnels.

Cette publication tient compte des marchandises acheminées par plus d'une société ferroviaire au Canada. Ces mouvements sont compris dans les totaux de chaque société ferroviaire, mais ne figurent pas dans le total général pour toutes les sociétés ferroviaires afin d'éviter tout double compte.

Qualité et limites des données

Le volume total de marchandises transportées, indiqué ici ne tient pas compte du trafic faisant l'objet de raccordements assurés par des services intermédiaires. Ces services, transportant moins de 1% du tonnage, sont inclus dans le chiffre des (tonnes métriques transportées) qui figure dans le tableau 16 (n^o 52-215 au catalogue). En conséquence, ces deux chiffres diffèrent jusqu'à un certain point.

En ce qui concerne le trafic rail-route, les chiffres de la présente publication ne portent que sur le trafic pour lequel un expéditeur fait demande de livraison par voie ferrée d'une remorque ou d'un conteneur comme tel. Ne sont pas comprises sous cette rubrique les marchandises qui sont envoyées en vrac par l'expéditeur et que la société ferroviaire choisit de transporter dans un conteneur ou une remorque qui lui appartient, sur un wagon plat plutôt que dans un wagon couvert, par exemple. Ce genre de trafic est compris dans divers autres groupes de produits selon la nature de la marchandise transportée.

Les données de la présente publication ont été vérifiées et calculées à partir de déclarations remplies à la main et par ordinateur par les transporteurs. Ces statistiques ne font pas normalement l'objet de variations.

Si le lecteur désire effectuer une analyse à long terme des données sur les marchandises par chemin de fer à l'aide de cette série (n^o 52-211 au catalogue), il voudra bien prendre note qu'on a modifié la structure de la classification et les méthodes de déclaration en 1970. C'est cette année-là que le système de 320 classes de marchandises a été établi et que certaines entreprises ferroviaires ont commencé à déclarer des données sur les marchandises "livrées" plutôt que sur les marchandises "reçues". Une explication plus détaillée des effets de ces modifications sur les statistiques figure dans l'édition de 1970 de la présente publication.

Concepts et définitions

Aux fins des tableaux, les sociétés ferroviaire qui desservent des localités au Canada et aux États-Unis considèrent la partie

States rail connection for the purpose of these tabulations. Thus freight crossing the International Boundary, whether from or to a non-reporting United States railroad at that point, or carried by one of the respondents reporting in this series, appears as a receipt from or a delivery to a United States rail connection. Certain extensions of Canadian National and Canadian Pacific rail services in the United States (116 kilometres and 520 kilometres respectively, in 1981) are, for statistical purposes, considered part of the Canadian operations and included herein. These mileages include, for the most part, overhead movements (Canada to Canada through the United States) and short rail extensions across the border to connecting United States carriers.

The terms used in the columnar headings throughout this publication reflect the following instructions to the railways.

"Loaded" means: revenue freight originated directly on the road of the respondent, including that received from private, non-reporting industrial sidings; freight received from switching roads connecting with the respondent where such freight has not previously been given line haul transportation; freight received from other modes of transport; freight re-shipped following milling or fabrication at some point in transit; and idler or trailer cars.

"Received from other railways in Canada" means: traffic received directly from connecting Canadian rail carriers and receipts from other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a previous rail haul is indicated.

"Received from United States rail destined to Canadian points" means: traffic received from United States rail connections, or transported across the border by the respondent, destined to Canadian points.

"Received from United States rail destined to United States points" means: freight moving from United States rail connections to points in the United States (overhead traffic).

"Unloaded" means: freight terminated directly on the road of the respondent, including that delivered to private, non-reporting industrial sidings and grain unloaded at interior, lake and coastal elevators for export; freight delivered to switching roads connecting with the respondent where there is no further line haul; freight delivered to other modes of transport; and freight unloaded for milling or fabrication at some point in transit.

"Delivered to other railways in Canada" means: traffic delivered directly to connecting Canadian rail carriers and deliveries to other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a subsequent rail haul is indicated.

située aux États-Unis comme faisant partie de ce pays. Ainsi, une marchandise qui traverse la frontière internationale, en provenance ou à destination d'un chemin de fer américain non enquêté à cet endroit ou une marchandise transportée par l'un des enquêtés est inscrite comme une marchandise en provenance ou à destination d'un raccordement aux États-Unis. Certains prolongements du Canadien National et du Canadien Pacifique aux États-Unis (116 kilomètres et 520 kilomètres respectivement en 1981) sont considérés comme canadiens à des fins statistiques et sont inclus dans cette publication. Dans la majorité des cas, il s'agit de mouvements intermédiaires (du Canada au Canada en passant par les États-Unis) et de courts prolongements ferroviaires de l'autre côté de la frontière raccordés à des transporteurs américains.

Les expressions utilisées dans les en-têtes de la présente publication proviennent des directives suivantes adressées aux sociétés ferroviaires.

"Chargées" signifie: transport commercial de marchandises effectué directement sur une ligne de l'enquêté, y compris les marchandises provenant d'embranchements privés non enquêtés; marchandises provenant de voies d'aiguillage reliées à celle de l'enquêté lorsque les marchandises n'ont pas déjà fait l'objet d'un transport proprement dit; marchandises provenant d'autres modes de transport; marchandises réexpédiées après usinage ou transformation en cours de route; et wagons-allonges.

"Provenant d'autres sociétés ferroviaires du Canada" signifie: marchandises provenant directement de raccordements ferroviaires canadiens et provenant d'autres modes de transport (autres que les traversiers d'automobiles), lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un transport ferroviaire antérieur est indiqué.

"Provenant de voies des États-Unis et destinées à des localités canadiennes" signifie: marchandises, provenant de raccordements ferroviaires américains ou transportées de ce côté-ci de la frontière par l'enquêté et destinées à des localités canadiennes.

"Provenant de voies des États-Unis et destinées à des localités américaines" signifie: marchandises passant de raccordements ferroviaires des États-Unis à des localités des États-Unis (trafic intermédiaire).

"Déchargées" signifie: marchandises livrées directement à partir d'une ligne de l'enquêté, y compris celles livrées à des embranchements privés non enquêtés et les céréales déchargées à des élévateurs intérieurs, à des élévateurs sur les lacs et sur la côte en vue de l'exportation; marchandises livrées à des voies d'aiguillage reliées à celles de l'enquêté au point où à partir duquel plus aucun transport n'a eu lieu; marchandises livrées à d'autres modes de transport; et marchandises déchargées en vue de la transformation ou de l'usinage en cours de route.

"Livrées à des chemins de fer du Canada" signifie: marchandises livrées directement à des raccordements ferroviaires du Canada et marchandises livrées à d'autres modes de transport (autres que les traversiers d'automobiles) lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un autre transport ferroviaire subséquent est indiqué.

“Delivered to United States rail” means: traffic delivered to United States rail connections or transported across the border by the respondent; and deliveries to United States rail connections of freight originated in the United States and moved overhead through Canada.

A “common carrier” refers to a railway which holds itself out to the general public to transport goods and/or passengers for compensation.

“Intermediate switching” is a switching service which includes all the elements of switching performed by a carrier which neither originates or terminates the shipment nor receives a line haul on that shipment.

To eliminate duplicate reporting and to uncover statistical gaps, Statistics Canada uses the Canadian *Standard Industrial Classification Manual* (SIC) which provides a set of groups and classes suitable for the compilation of statistics related to different industries. The building block (reporting unit) which fits into the above structure is the “establishment”. An establishment can be defined as the smallest unit which is a separate operating entity capable of reporting principal elements of input and output. While the establishment is typically a factory, mine, store or similar unit and in most cases is a separate firm it may encompass two or more operating units which are not necessarily in the same location. It can also be an individual working on his own account.

Industry 503, Railway Transport, as classified in the SIC includes establishments primarily engaged in operating railways. The kinds of activities normally carried on by railway establishments embraces the operation of railway freight and passenger trains, commuter service (but not street railways), maintenance of way and structures, maintenance of equipment (including that carried on in railway shops), dining car and sleeping car services, express and the operation of railway terminal facilities. Road transportation services operated by railway establishments and providing pick-up and delivery for the freight or express services of the railway are included in this industry but long-distance trucking operations owned by railway companies are usually set up as separate establishments classified to the trucking industry, except CN express. For reporting purposes, only railways classified as “common carriers” by the Canadian Transport Commission file annual reports under Section 325 of the Railway Act 1970 jointly to the Canadian Transport Commission and Statistics Canada.

Statistical Highlights

Revenue freight traffic handled by railways in Canada totalled 222.9 million tonnes, up 4.8% from 1982. Domestic loadings increased 4.9% to 209.3 million tonnes while receipts from U.S. connections increased by 3.0% to 13.6 million tonnes.

“Livrées à des chemins de fer des États-Unis” signifie: marchandises livrées à des raccordements ferroviaires des États-Unis ou transportées au-delà de la frontière par l'enquête; et livraisons à des raccordements ferroviaires des États-Unis de marchandises provenant des États-Unis et passant par le Canada.

Une “société ferroviaire de transport public” désigne toute entreprise ferroviaire qui offre au grand public un service de transport de marchandises et (ou) de passagers contre rétribution.

Le “raccordement intermédiaire” est un service de raccordement qui comprend toutes les activités de raccordement exercées par un transporteur autre que le premier ou le dernier transporteur et qui ne s'occupe pas du transport interurbain de cette marchandise.

Afin d'éviter qu'il y ait double déclaration et de découvrir les lacunes statistiques, Statistique Canada utilise la *Classification des activités économiques* (CAÉ) qui fournit des groupes et des classes convenant au calcul de statistiques portant sur diverses activités économiques. Le groupe (unité déclarante) que l'on insère dans la structure ci-dessus est l'“établissement”. Un établissement peut se définir comme la plus petite unité constituant un ensemble d'exploitation séparé en mesure de déclarer les éléments utilisés et produits. L'établissement est généralement une usine, une mine, un magasin ou une unité semblable et la plupart du temps une entreprise séparée, mais il peut englober deux unités ou plus qui ne sont pas nécessairement au même endroit. Il peut aussi s'agir d'une personne travaillant à son propre compte.

L'activité économique 503, Transports ferroviaires, comprend, selon la CAÉ, les établissements dont l'activité principale est l'exploitation de chemins de fer. Les activités habituelles de ces établissements ferroviaires comprennent le transport de passagers et de marchandises, les services aux banlieues (à l'exception des chemins de fer urbains et des tramways), l'entretien de la voie et des ouvrages, l'entretien du matériel (y compris le travail effectué dans les ateliers des chemins de fer), les services de wagons-restaurants et de wagons-lits, les services de messageries et l'exploitation de terminus ferroviaires. Les services de transport routier exploités par des établissements ferroviaires et fournissant des services de ramassage et de livraison de marchandises ou les services de messageries des chemins de fer sont inclus dans cette activité économique. Toutefois, le camionnage interurbain effectué par des sociétés ferroviaires constitue habituellement un établissement séparé, classé avec le camionnage, sauf les messageries CN. À des fins de déclaration, seulement les chemins de fer que la Commission canadienne des transports classe sous la rubrique “société ferroviaire de transport public” présentent des déclarations annuelles conjointement à la Commission et à Statistique Canada en vertu de l'article 325 de la Loi de 1970 sur les chemins de fer.

Points saillants

Les marchandises payantes transportées par chemin de fer au Canada en 1983 ont totalisé 222.9 millions de tonnes métriques, soit une augmentation de 4.8% sur 1982. Les chargements au Canada ont augmenté de 4.9% pour se chiffrer à 209.3 millions de tonnes métriques, tandis que le volume des marchandises en provenance de lignes américaines a connu une augmentation de 3.0% pour s'établir à 13.6 millions de tonnes métriques.

TABLE 1. Revenue Freight Carried by Railways within Canada - Summary, 1983

No.	Commodity	Number of railways cars	Loaded onto railways cars	Received from other railways	Received from United States rail En provenance des États-Unis	
		Nombre de wagons	Chargées sur wagons	En provenance d'autres chemins de fer	Destined to Canadian points À destination du Canada	Destined to United States points À destination des États-Unis
		cars - wagons		metric - tonnes - métriques		
SECTION II:						
Food, feed, beverages and tobacco (C.L.):						
140	Feeds of animal origin	539	20 132	7 123	1 312	45
142	Primary or concentrated feeds	1	43	-	-	1 158
144	Secondary or complete animal feeds, n.e.s.	897	35 535	14 946	5 550	64 859
146	Non-alcoholic beverages	140	3 275	-	2 288	-
148	Ale, beer, stout and porter	1,270	28 330	3 015	8 316	9 158
150	Wines and fermented alcoholic beverages, n.e.s.	5	289	230	4 055	21 683
152	Distilled alcoholic beverages	344	22 074	1 771	58	2 372
154	Cigarettes	-	-	-	27	-
156	Tobacco, unmanufactured	106	3 528	-	-	-
158	Tobacco, manufactured, n.e.s.	20	662	54	-	-
992	Total	577,328	37 425 087	1 814 148	1 027 326	1 349 470
SECTION III:						
Crude materials, inedible (C.L.):						
160	Raw hides and skins (including fur skins)	136	6 436	95	7 669	4 716
162	Primary tannage	266	15 994	3 715	1 728	6 519
164	Crude animal products, inedible, n.e.s. (excluding fibres)	1	11	253	1 490	-
166	Seeds for sowing, n.e.s.	325	20 733	3 308	1 107	1 059
168	Flaxseed	7,229	505 181	1 096	1 456	-
170	Rapeseed	20,168	1 350 624	30 775	3 358	-
172	Soyabeans	42	3 602	36	15 550	-
174	Oil seeds, oil nuts and oil kernels, n.e.s.	585	37 612	3 316	27 881	796
176	Rubber and allied gums, natural	829	43 542	32 200	953	-
178	Peatmoss and mosses, n.e.s.	923	19 449	315	-	-
180	Other crude vegetable materials, inedible, n.e.s.	8	268	1 817	3 947	-
182	Logs and bolts of wood	16,894	990 927	1 132	2 677	4 210
184	Fence posts, pitprops and piling of wood	100	4 426	587	197	-
186	Round timber, n.e.s.	2,084	85 279	13 822	5 701	1 120
188	Pulpwood logs	36,903	2 351 155	633 792	80	19 614
190	Pulpwood chips	144,207	7 998 700	222 874	3 883	65 620
192	Christmas trees	39	631	273	-	336
194	Other crude wood materials, n.e.s.	70	3 008	330	144	-
196	Silk, wool and animal hair	24	441	67	-	-
198	Cotton	12	407	4 864	50 818	-
200	Vegetable and man-made textile fibres (excluding cotton)	1,301	49 254	40 460	206	907
202	Bauxite ore and alumina	40,265	3 049 810	17 383	32 726	8 840
204	Copper ores and concentrates	17,250	1 488 008	229 906	-	-
206	Copper matte and precipitates	-	-	1 991	5 246	-
208	Iron ore and concentrates	320,056	30 275 911	9 981 773	5 480	-
210	Lead ore and concentrates	6,942	555 979	68 736	31 607	-
212	Manganese ore	3	171	1 265	3 791	-
214	Nickel, copper ores and concentrates	36,655	2 737 517	-	-	-
216	Nickel ore and concentrates	-	-	-	-	-
218	Matte, nickel, copper-nickel or nickel-iron chromium alloy	1,109	96 971	6 097	-	-
220	Tungsten ore and concentrates	13	777	-	-	-
222	Zinc ore and concentrates	17,655	1 435 607	339 767	135 007	-
224	Lead and zinc ores and concentrates	2	147	525	13 991	-
226	Metallic ores and concentrates, n.e.s.	392	30 266	3 077	6 057	3 361
228	Iron and steel scrap	23,189	1 356 177	297 854	354 627	8 780
230	Non-ferrous metal scrap (including precious metal scrap)	994	54 119	24 235	17 718	2 227
232	Slags, drosses and other by-products, n.e.s.	1,486	117 128	28 803	6 631	2 462
236	Anthracite coal	2	178	7 382	39 196	1 821
238	Bituminous coal	278,550	24 181 630	134 289	73 244	28 847
240	Lignite coal	14,838	1 234 797	160	56	-
242	Coal, n.e.s.	216	15 152	7 111	8 770	4 799
244	Crude mineral oils (petroleum)	669	50 361	-	129	-
246	Natural gas and other crude bituminous substances	146	10 597	145	-	-
248	Asbestos, unmanufactured, crude and fibre	2,053	117 604	8 318	849	1 907
250	Clay	1,699	130 852	77 348	367 609	35 319
252	Other crude refractory materials	5	310	91	1 507	-
254	Natural abrasives	114	9 248	11 610	22 359	512
256	Sand, industrial	4,445	353 980	26 186	453 473	8 966
258	Sand, n.e.s.	3,750	257 341	845	5 953	114
260	Gravel	62	3 593	6 650	6 792	-
262	Building stone, rough	30	1 678	179	1 832	2 058
264	Silica or siliceous, n.e.s.	88	7 186	1 395	4 912	421
266	Agricultural limestone	916	55 608	8 306	2 778	149
268	Limestone, furnace or foundry, and fluxing stone	3,122	256 758	177	322	-
270	Limestone, crushed or broken, n.e.s.	34,731	2 678 541	10 001	21 490	14 516
272	Stone, n.e.s. (including stone refuse)	1,536	100 273	9 089	2 952	7 437
274	Barytes, natural	659	43 516	14 772	310	-

See footnote(s) at end of table.

TABEAU 1. Marchandises payantes transportées par chemin de fer au Canada - Sommaire, 1983

Total freight traffic(1) (initial haul), 1983	Unloaded from railway cars	Delivered to other railways	Delivered to United States rail	Type de marchandise	No
Total du trafic de marchandises(1) (transport initial), 1983	Déchargées du wagon	Remises aux autres chemins de fer	Remises au réseau des États-Unis		
	metric - tonnes - métriques				
				SECTION II:	
				Denrées alimentaires, aliments pour animaux, boissons et tabacs (charge complète):	
21 489	16 556	7 405	4 651	Aliments d'origine animale pour animaux	140
1 201	43	-	1 158	Aliments concentrés pour animaux	142
105 944	46 588	9 274	65 026	Aliments complets pour animaux, n.d.a.	144
5 563	5 543	-	20	Boissons non alcooliques	146
45 804	35 394	2 898	10 527	Ale, bière, stout et porter	148

-	-	-	3 879 142	35 040 461	" "	Remises au réseau des Etats-Unis

(1) Comprend l'ensemble du trafic marchandises effectué par chaque société ferroviaire individuelle. Les marchandises provenant d'autres sociétés ferroviaires du Canada seront ainsi également incluses dans les totaux pour une société ferroviaire ou plus.

(2) Non compris les remorques et conteneurs qui sont la propriété des compagnies ferroviaires (plan II) et dont le fret a été classé par type de marchandise suivant le contenu de la remorque ou conteneur.

AVAILABLE PUBLICATIONS

Publications produced by the Transportation and Communications Division dealing with Railway Transport Statistics.

Catalogue

Periodical

- 52-001 Railway Carloadings (Monthly), Bil.
Cars and tonnes of revenue freight loaded in Eastern and Western Canada, by 70 commodities.
- 52-003 Railway Operating Statistics (Monthly), Bil.
Financial, traffic and operating statistics of railways in Canada.
- 52-004 Railway Transport Service Bulletin (Occasional), Bil.
Summary releases in advance of regular publications and results of special studies.

Annual

- 52-205 Railway Freight Traffic, Bil.
Revenue freight carried in Canada, by province and region with details for more than 300 commodities.
- 52-207 Railway Transport: Part I, Bil. (Last issue 1981)
Comparative summary statistics — latest five years. Includes accident statistics.
- 52-208 Railway Transport: Part II, Bil. (Last issue 1981)
Financial Statistics.
- 52-209 Railway Transport: Part III, Bil. (Last issue 1981)
Equipment, track and fuel statistics.
- 52-210 Railway Transport: Part IV, Bil. (Last issue 1981)
Operating and traffic statistics.
- 52-211 Railway Transport in Canada — Commodity Statistics, Bil. formerly called: Railway Transport, Part V.
Freight carried by principal commodity classes.
- 52-212 Railway Transport: Part VI, Bil. (Last issue 1981)

CHOIX DE PUBLICATIONS

Publications produites par la Division de transports et des communications sur la statistique du transport ferroviaire.

Catalogue

Périodiques

- 52-001 Chargements ferroviaires (mensuel), Bil.
Nombre de wagons chargés et volume du fret payant chargé dans l'est et l'ouest du Canada, pour 70 produits.
- 52-003 Statistique de l'exploitation ferroviaire (mensuel), Bil.
Statistiques des finances, du trafic et de l'exploitation des transporteurs ferroviaires du Canada.
- 52-004 Bulletin de service sur le transport par rail (hors série), Bil.
Communiqués paraissant avant la publication des bulletins réguliers et résultats d'études spéciales.

Annuelles

- 52-205 Trafic-marchandises ferroviaire. Bil.
Fret payant transporté par province et région, avec détails pour plus de 300 produits.
- 52-207 Transport ferroviaire: Partie I, Bil. (Dernière édition 1981)
Résumé comparatif des statistiques — cinq dernières années. Statistiques des accidents.
- 52-208 Transport ferroviaire: Partie II, Bil. (Dernière édition 1981)
Statistiques de la situation financière.
- 52-209 Transport ferroviaire: Partie III, Bil. (Dernière édition 1981)
Statistiques du matériel, des voies et du carburant.
- 52-210 Transport ferroviaire: Partie IV, Bil. (Dernière édition 1981)
Statistiques de l'exploitation et du trafic.
- 52-211 Transport ferroviaire du Canada — Statistiques sur les marchandises, Bil. autrefois appelée: Transport ferroviaire: Partie V Bil.
Marchandises transportées, par grands groupes de produits.
- 52-212 Transport ferroviaire: Partie VI, Bil. (Dernière édition 1981)

Catalogue

Employment statistics.

- 52-213 Canadian National Railways and Canadian Pacific Limited, Bil. (Last issue 1981)

Financial and operating statistics of the entire systems — latest five years.

- 52-214 Railway Transport, (Annual), Bil.

Railway commodity origin and destination statistics.

- 52-215 Railway Transport in Canada, — General Statistics First issue, Bil.

Bil. — Bilingual

In addition to the selected publications listed above, Statistics Canada publishes a wide range of statistical reports on Canadian economic and social affairs. A comprehensive catalogue of all current publications is available free on request from Statistics Canada, Ottawa (Canada), K1A 0T6.

Catalogue

Statistiques de l'emploi.

- 52-213 Les chemins de fer Nationaux du Canada et Canadien Pacifique Limitée, Bil. (Dernière édition 1981)

Statistiques de la situation financière et de l'exploitation de l'ensemble des systèmes — cinq dernières années.

- 52-214 Transport ferroviaire, (annuel), Bil.

Statistique sur l'origine et la destination des marchandises transportées par chemin de fer.

- 52-215 Transport ferroviaire du Canada, — Statistics générales première édition, bil.

Bil. — Bilingue

Outre les publications énumérées ci-dessus, Statistique Canada publie une grande variété de bulletins statistiques sur la situation économique et social du Canada. On peut se procurer gratuitement un catalogue complet des publications courantes en s'adressant à Statistique Canada, Ottawa (Canada), K1A 0T6.

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Surface and Marine Transport Section,
Transportation Division,
Statistics Canada, Ottawa, K1A 0T6 (Telephone: 991-2484) or
to the Statistics Canada reference centre in:

St. John's (772-4073)	Sturgeon Falls (753-4888)
Halifax (426-5331)	Winnipeg (949-4020)
Montreal (283-5725)	Regina (359-5405)
Ottawa (990-8116)	Edmonton (420-3027)
Toronto (973-6586)	Vancouver (663-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional references centres.

Newfoundland and Labrador	Zenith 0-7037
Nova Scotia, New Brunswick and Prince Edward Island	1-800-565-7192

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des transports de surface et maritimes,
Division des transports,
Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-6154) ou au
centre de consultation de Statistique Canada à:

St. John's (772-4073)	Sturgeon Falls (753-4888)
Halifax (426-5331)	Winnipeg (949-4020)
Montréal (283-5725)	Regina (359-5405)
Ottawa (990-8116)	Edmonton (420-3027)
Toronto (973-6586)	Vancouver (663-3691)

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE

An explanation of abbreviations used throughout this report follows:

- N.E.S. - not elsewhere specified.
- C.L. - carload.
- L.C.L. - less than carload.
- T.O.F.C. - trailer on flat car.
- C.O.F.C. - container on flat car.

This publication was prepared under the direction of:

- **R.E. Drover**, Director, Transportation Division
- **B.G. Nemes**, Assistant Director
- **W.D. Penner**, Chief, Surface and Marine Transport Section
- **W. Reinhard**, Head, Surface Transport Unit

Signes conventionnnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTA

L'explication des abréviations employés dans le présent bulletin:

- N.D.A. - non dénommé ailleurs.

Ces abréviations ne sont pas utilisées en français.

Cette publication a été rédigée sous la direction de:

- **R.E. Drover**, directeur, Division des transports
- **B.G. Nemes**, directeur adjoint
- **W.D. Penner**, Chef, Section des transports de surface et maritimes
- **W. Reinhard**, chef, sous-section du transport de surface

Highlights

Highlights of the 1984 data on commodities transported by the major railways in Canada are as follows:

Based on the monthly data,

- the total revenue freight transported within Canada during 1984 was 254.6 million tonnes. This represented a 15% increase over 1983.
- a major proportion (50.1%) of the freight transported in 1984 consisted of crude materials; fabricated materials followed at 27.3%.

Based on the annual report,

- the revenue freight carried by railways within Canada in 1984 (including receipts from Canadian connections), totalled 286.4 million tonnes, an increase of 14.2% over 1983.
- domestic loadings increased 14.8% to 240.3 million tonnes while receipts from U.S. connections increased 8.8%, to 14.8 million tonnes

Faits saillants

Les faits saillants, en 1984, pour le transport des produits par les principales compagnies ferroviaires sont les suivants:

Sur la base de données mensuelles,

- au Canada le trafic commercial a été 254.6 millions de tonnes en 1984. Ceci représente une hausse de 15% par rapport à 1983.
- la plus grande proportion (50.1%) du trafic en 1984 était constitué de matières brutes suivis de produits semi finis (27.3%).

Sur la base des données annuelles,

- le trafic commercial par chemin de fer au Canada a été 286.4 millions de tonnes (incluant les inter-connections) soit une augmentation en volume de 14.2% par rapport à 1983.
- les chargements locaux ont augmenté de 14.8% pour atteindre 240.3 millions de tonnes alors que les inter-connections en provenance des États-Unis ont augmenté de 8.8% pour atteindre 14.8 millions de tonnes.

Introduction

This publication brings together under one cover, a summary of statistics on commodities transported by the major railways in Canada during 1984. Previously, this information was published in two separate annual publications:

- **Railway Freight Traffic** (Catalogue No. 52-205)
- **Railway Transport In Canada: Commodity Statistics** (Catalogue No. 52-211)

Statistics presented in this integrated publication are derived from two surveys conducted by the Transportation Division of Statistics Canada:

- The railway Annual Report – Revenue Freight Carried (Schedule 11) and,
- The monthly survey Railway Transport – Revenue Freight Traffic.

The principal objective for combining the above surveys is to provide total information on the output, size, structure and economic performance of Canada's railway industry. Rail data are also used for the establishment of National economic statistics (such as the Gross National Product and the Gross Domestic Product).

This publication contains commodity information on shipment origins and destinations by province. Statistics by major railways are also provided.

The data are collected in accordance with the provisions of Section 325 of the Railway Act, R.S.C. 1970 c.R-2, and the Statistics Act, Chapter 15, Statutes of Canada 1970-71-72.

Users are encouraged to contact the Transportation Division for additional information and services. A complete list of publications available from the Transportation Division is provided at the back of this publication.

Coverage

Revenue Freight Traffic Statistics

The revenue freight traffic data presented in this publication are obtained from the 21 Class I and Class II common carrier railways operating in Canada.

Cette publication rassemble, le sommaire des données sur les produits transportés par les principales compagnies ferroviaires au Canada en 1984. Auparavant, ces données étaient publiées dans deux publications annuelles distinctes:

- **Trafic de marchandises ferroviaires** (n° 52-205 au catalogue)
- **Transport ferroviaire au Canada: Statistiques sur les marchandises** (n° 52-211 au catalogue)

Les statistiques présentées dans cette publication intégrée sont tirées des conclusions de deux enquêtes faites par la Division des Transports de Statistique Canada:

- Rapport annuel – Marchandise payante transportée (section 11) et,
- Transport ferroviaire: Trafic des marchandises payantes – (enquête mensuelle)

L'objectif principal de la combinaison de ces deux enquêtes est de donner une information complète sur l'output, la dimension, la structure et les performances économiques de l'industrie ferroviaire au Canada. Ces données sont également utilisées dans le calcul des comptes nationaux.

Cette publication contient des informations sur les origines et destinations des marchandises par province, ainsi que les statistiques des principales compagnies ferroviaires.

Les données sont collectées en vertu de la section 325 de la loi de chemins de fer, RSC 1970 c.R-2, et de la loi sur les statistiques, chapitre 15, Statuts du Canada 1970-71-72.

Pour toute information complémentaire et information au sujet de services disponibles, nous suggérons aux lecteurs de contacter La Division des transports. Le lecteur trouvera à la fin de la présente publication, la liste des publications disponibles à la Division des Transports.

Champ d'observation

Statistique du trafic commercial

Les données du trafic commercial, publiées dans cette publication sont obtenus de 21 compagnies ferroviaires (transporteurs publics) de Classe 1 et 2 opérant au Canada.

These companies are recorded on Statistics Canada's Business Register by a Standard Industrial Classification code (Industry Group 453 – Railway Transport and Related Service Industries). A complete description of the classification system is available from the **Standard Industrial Classification Manual, 1980** (Catalogue No. 12-501).

Railway Commodity Statistics

Commodity detail is published on the basis of a 320 code structure derived from the Standard Commodity Classification (SCC) of Statistics Canada. A description of the classification system is presented in the **Standard Commodity Classification Manual, 1972** (Catalogue No. 12-502). The principal criteria employed for SCC grouping are: stage of fabrication; chief component material; and, purpose.

Railway companies within the legislative authority of the Parliament of Canada are classified as follows:

- Class I – Canadian National Railways, Canadian Pacific Limited and Via Rail Canada Inc., and their related operations.
- Class II – Other carriers involved in Canadian rail transportation operations.

Methodology

Data presented in this publication are derived from a mail census of Class I and II common carrier railway companies operating in Canada on forms specified by the Railway Transport Committee of the Canadian Transport Commission and the Transportation Division of Statistics Canada.

Individual reports undergo a comprehensive review by the Transportation Division. Traffic patterns are studied to see if they are consistent with historical trends and carloads are compared against tonnages, on an individual commodity basis, to ensure that the weight reported per car is within acceptable parameters. Also, a reasonability check is performed to ensure that tonnages reported as "loaded in Canada" and the tonnages "received from the United States" agree with the total tonnages "unloaded in Canada" plus amounts "delivered to railways in the United States".

Ces compagnies sont enregistrées sur le registre des entreprises de Statistique Canada par le code de la classification des activités économiques (Groupe Industriel 453 – Industries ferroviaires et Services Connexes). La description du système de Classification est incluse dans le manuel **Classification des activités économiques, 1980** (n° 12-501 au catalogue).

Statistique sur les produits

Le détail des produits qui est publié sur une base de 320 structure de code est tiré du manuel **Classification Type de Produits (CTP) de Statistique Canada**. La description du système de classification est présentée dans le manuel **Classification Type de Produits, 1972** (n° 12-502 au catalogue). Le critère principal employé pour le regroupement par CTP sont les suivants: stage de production; le produit principal de la composition; et, l'objectif.

Les compagnies qui sont sous l'autorité du Parlement Canadien sont classées comme suit:

- Classe I – Le Canadien National, le Canadien Pacifique et Via Rail et leurs opérations connexes.
- Classe II – Les autres transporteurs impliqués dans le transport ferroviaires.

Méthodologie

Les données présentées dans cette publication sont tirées d'un recensement de compagnies ferroviaires de Classe I et II opérant au Canada selon des critères indiqués par le Comité de Transport Ferroviaire de la Commission de Transport du Canada et la Division des Transports de Statistique Canada.

Chaque rapport est étudié très soigneusement par la Division des Transports. Les trafics sont étudiés pour voir s'ils sont conformes aux tendances historiques, les chargements et les tonnages sont comparés par produits afin de s'assurer que le poids par wagon est dans des limites acceptables. Une soigneuse vérification a été aussi faite afin de s'assurer que les tonnages reportés comme "chargés au Canada" et les tonnages "reçus des États-Unis" coïncident avec les tonnages totaux "déchargés au Canada" plus le montant "livrés à des chemins de fer des États-Unis".

Data Quality and Limitations

Users should note the following points concerning railway freight commodity statistics:

1. Most respondents report their data in short tons which are converted to metric tonnes by Statistics Canada.
2. The total volume of freight carried, as shown in the tables in this publication, does not take into account traffic handled in switching services. The latter, involving less than 1% of all tonnage, is included in the "Metric tonnes carried" total in Table 17 of Catalogue No. 52-215, **Railway Transport In Canada – General Statistics**.
3. For piggyback freight, the figures reported include only that portion of traffic where a shipper submitted a trailer or container for shipment by rail. Not included under this heading, are goods submitted by the shipper as "loose merchandise" which the railways chose to move in a railway-owned trailer (or container) on a flat car as opposed to, for example, a box car. Thus, loose merchandise freight is included with various other commodity groups according to the nature of the merchandise involved.

Explanatory Notes

The following notes regarding the data presented in this publication should be considered:

1. **Freight interlined between two-or-more Canadian rail carriers** – is included only once to avoid duplication. Traffic handled in intermediate switching service is excluded.
2. A railway which operates in both Canada and the United States will have all traffic south of the border considered a United States rail connection for the purpose of this publication. Thus, freight crossing the international boundary (whether from or to a non-reporting United States railroad at that point, or carried by one of the respondents reporting in this series), appears as a "receipt from" or "delivery to" a United States rail connection. Certain extensions of Canadian National and Canadian Pacific rail services

Qualité et limites des données

Le lecteur doit noter les points suivants concernant les statistiques de produits transportés par chemin de fer:

1. La plupart des répondants soumettent leurs données en tonne courte que Statistique Canada convertit en tonne métrique.
2. Le volume total de fret transporté, comme l'indiquent les tableaux de cette publication ne prennent pas en compte les trafics de raccordement. Ce dernier, qui représente moins de 1% du tonnage total, est inclus dans le total des "tonnes métriques transportés", tableau 17 du catalogue n° 52-215 **Transport Ferroviaire au Canada – Statistique Canada**.
3. Pour le fret route-rail, les données ne contiennent que la portion du trafic pour laquelle les expéditeurs ont soumis une remorque ou un conteneur pour expédition par rail. Sont exclus de ce sous titre, les marchandises soumises pour les expéditeurs comme "marchandise divers" que les compagnies ferroviaires transportent par leurs propres remorqueurs (ou conteneur) dans un wagon plat par opposition, par exemple, à un wagon couvert. Donc, le fret de marchandises diverses est incluse avec plusieurs autres groupes de produits en accord avec la nature des marchandises impliquées.

Notes explicatives

Les notes suivantes, concernant les données présentées dans cette publication doivent être prises en compte:

1. **Le fret transporté par deux ou plusieurs compagnies ferroviaires canadiennes** – est inclu seulement une fois afin d'éviter le double comptage. Le fret transporté par le service d'aiguillage intermédiaire est exclus.
2. Aux fins de cette publication, une compagnie qui opère au Canada et aux États-Unis aura tout son trafic au sud de la frontière considéré comme une connection ferroviaire au États-Unis. Par conséquent, le fret qui traverse la frontière (qu'il provienne ou qu'il soit destiné à une compagnie ferroviaire américaine non enquêté ou transporté par une firme enquêté dans cette série) apparaît comme un "provenant de" ou "livrées à" à la compagnie ferroviaire américaine. Pour des fins statistiques, certains services ferroviaires du Canadien National et du Canadien Pacifique

in the United States are, for statistical purposes, considered part of the Canadian operations and are included herein. This includes, for the most part, **overhead movements** (Canada to Canada through the United States) and short rail extensions across the border to connecting United States carriers.

3. Data presented in **Tables 1 and 2** (2.1 – 2.11) are derived from monthly returns regarding Revenue Freight Traffic whereas, **Table 3** shows similar data derived from the Annual Reports. The totals as shown, however, are not identical because year end adjustments have been applied by the respondents.
4. **Table 1** provides a summary of all revenue freight transported by railways within Canada.
5. **Tables 2.1 to 2.11** present data separately for those commodities where the tonnage of revenue freight receiving initial/final rail haul exceeds an arbitrary weight limit. It should be noted that these limits vary from province to province. Other commodities hauled are grouped under the stub heading "All Other". Individual tabulations are available for those commodities included in the "All Other" groups, on a cost recovery basis from the Transportation Division.
6. **Table 3** is derived from the results of the Revenue Freight Carried section of the Annual Report (Schedule 11). Data for eight major railways are shown individually and the statistics for the remaining railways are grouped under Class II "All Other". Freight interlined between railways operating in Canada is also shown in Table 3. These movements are included in the totals for individual companies.
7. Individual items may not add to totals because of rounding.

aux États-Unis sont considérés comme partis intégrantes de leurs opérations canadiennes et traités comme tels. Sont inclus dans ces services, pour la plupart, **les mouvements inter-médiaires** (du Canada au Canada en passant par les États-Unis) et de courts prolongements ferroviaires de l'autre côté de la frontière raccordés à des transporteurs américains.

3. Les données présentées dans les **tableaux 1 et 2** (2.1 – 2.11) sont dérivés des enquêtes mensuelles, Trafic des marchandises payantes alors que le **tableau 3** qui montre des données similaires qui sont tirés des enquêtes annuelles. Cependant, les totaux tels qu'indiqués ne sont pas égaux à cause des ajustements de fin d'année ont été appliqué par les répondants.
4. Le **tableau 1** fournit un sommaire du trafic commercial ferroviaire au Canada.
5. Les **tableaux 2.1 à 2.11** présentent les données séparées de produits dont le tonnage de marchandises payantes, transport initial ou final par chemin de fer dépasse la limite de poids arbitraire – Il convient de noter que ces limites varient d'une province à l'autre. D'autres produits transportés sont groupés sous le sous-titre "Autres". Les totalisations spéciales sont disponibles, pour chacun de ces produits, sur la base de recouvrement des coûts à la Division des Transports.
6. Le **tableau 3** est tiré des résultats de la section Marchandises payantes transportées de l'enquête annuelle (Schedule 11). Les données des huit principales compagnies ferroviaires sont fournies séparément et les données des autres compagnies sont groupées dans Classe II "Autres". Le fret transporté par deux compagnies ou plus au Canada est montré dans le tableau 3. Ces mouvements sont inclus dans les totaux de chaque compagnies.
7. Les items individuels ne sont pas ajoutés aux totaux à cause des données arrondies.

Definitions

Respondents are advised to use the following definitions when completing their reports:

"Common carrier" – a railway which offers its services to the general public to transport goods and/or passengers for compensation.

"Delivered to United States rail" – traffic delivered to United States rail connections or transported across the border by the respondent.

"Deliveries to other railways in Canada" – traffic delivered directly to connecting Canadian rail carriers and deliveries to other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a subsequent rail haul is indicated.

"Intermediate switching" – a switching service which includes all the elements of switching performed by a carrier which neither originates or terminates the shipment nor receives a line haul on that shipment.

"Line haul" – the movement of trains between terminals and stations on the main or branch lines of the road, exclusive of switching movements.

"Loaded" – revenue freight originated directly on the track belonging to the respondent, including that received from private, non-reporting industrial sidings; freight received from switching roads connecting with the respondent where such freight has not previously been given line haul transportation; freight received from other modes of transport; freight re-shipped following milling or fabrication at some point in transit; and, idler or trailer cars.

"Received from other railways in Canada" – traffic received directly from connecting Canadian rail carriers and receipts from other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a previous rail haul is indicated.

"Received from United States rail destined to Canadian points" – traffic received from United States rail connecting, or transported across the border by the respondent, destined to Canadian points.

Définitions

Les répondants sont invités à utiliser les définitions suivantes lorsqu'ils remplissent leurs questionnaires:

"Société ferroviaire publique" – est une société qui offre au grand public un service de transport de marchandise et/ou de passagers contre rétribution.

"Livrées à des chemins de fer des États-Unis" – Les marchandises livrées à des raccordements ferroviaires ou transportées au delà de la frontière par l'enquête.

"Livrées à des chemins de fer du Canada" – marchandises livrées directement à des raccordements ferroviaires et marchandises livrées à d'autres modes de transport (autre que les traversiers d'automobiles) lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lors qu'un autre transport ferroviaire subséquent est indiqué.

"L'aiguillage intermédiaire" – est un service qui comprend toutes activité d'aiguillage exercées par un transporteur autre que le premier ou le dernier transporteur et qui ne s'occupe pas du transport interurbain de cette marchandise.

"Transport ferroviaire" – Déplacement de trains entre les terminus et les gares sur les voies principales ou les embranchements du chemin de fer, sauf l'aiguillage.

"Chargées" – le transport commercial de marchandises effectué directement sur une ligne de l'enquête, y compris les marchandises provenant d'embranchements privés non enquêtés; marchandises provenant de voies d'aiguillage reliées à celle de l'enquête lorsque les marchandises n'ont pas déjà fait l'objet d'un transport proprement dit; marchandises provenant d'autres modes de transport; marchandises réexpédiées après usinage ou transformation en cours de route; et wagons-allonges.

"Provenant d'autres sociétés ferroviaires au Canada" – marchandises provenant directement de raccordements ferroviaires canadiens et provenant d'autres modes de transport (autres que les traversiers d'automobiles), lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lors qu'un transport ferroviaire antérieur est indiqué.

"Provenant de voies des États-Unis et destinées à des localités canadiennes" – marchandises, provenant de raccordements ferroviaires américains ou transportées de ce côté-ci de la frontière par l'enquête et destinées à des localités canadiennes.

"Received from United States rail destined to United States points" – freight moving from United States rail connections to points in the United States (i.e. overhead traffic).

"Unloaded" – freight terminated directly on the road of the respondent. It includes: freight delivered to private, non-reporting industrial sidings and grain unloaded at interior, lake and coastal elevators for export; freight delivered to switching roads connecting with the respondent where there is no further line haul; freight delivered to other modes of transport; and, freight unloaded for milling or fabrication at some point in transit.

"Provenant de voies des États-Unis et destinées à des localités américaines" – marchandises passant de raccordements ferroviaires des États-Unis à des localités des États-Unis (trafic intermédiaire).

"Déchargées" – marchandises livrées directement à partir d'une ligne de l'enquête, y compris celles livrées à des embranchements privés non enquêtés et les céréales déchargées à des élévateurs intérieurs, à des élévateurs sur les lacs et sur la côte en vue de l'exportation; marchandises livrées à des voies d'aiguillage reliées à celles de l'enquête au point où à partir duquel plus aucun transport n'a eu lieu; marchandises livrées à d'autres modes de transport; et marchandises déchargées en vue de la transformation ou de l'usinage en cours de route.

- (1) Comprend l'ensemble du trafic marchandises effectué par chaque société ferroviaire individuelle. Les marchandises provenant d'autres sociétés ferroviaires du Canada seront ainsi également incluses dans les totaux pour une société ferriviaire ou plus.
- (2) Non compris les remorques et conteneurs qui sont la propriété des compagnies ferriviaires (plan II) et dont le fret a été classé par type de marchandise suivant le contenu de la remorque ou conteneur.

Did You Know

... That the Transportation Division collects operating statistics and origin-destination data for the trucking, bus, marine, rail and air transport industries?

... That the Transportation Division can provide special tabulations and analytical studies tailored to your business needs on a cost recovery basis?

... That you can obtain free of charge a catalogue describing the contents of the Transportation Division publications listed at the back of this book?

Find out how the Transportation Division can help you meet your information needs by writing to:

Data in Many Forms...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Surface and Marine Transport Section,
Transportation Division,
Statistics Canada, Ottawa, K1A 0T6 (Telephone: 991-2484) or
to the Statistics Canada reference centre in:

St. John's (772-4073)	Sturgeon Falls (753-4888)
Halifax (426-5331)	Winnipeg (949-4020)
Montreal (283-5725)	Regina (359-5405)
Ottawa (990-8116)	Edmonton (420-3027)
Toronto (973-6586)	Vancouver (663-3691)

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional references centres.

Des données sous plusieurs formes...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des transports de surface et maritimes,
Division des transports,
Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-6154) ou au
centre de consultation de Statistique Canada à:

Highlights

Highlights of the 1985 data on commodities transported by the major railways in Canada are as follows:

Based on the monthly data,

- the total freight transported within Canada during 1985 was 250.6 million tonnes, excluding receipts from Canadian connections. This represents a 1.6% decrease from 1984.
- crude materials continue to make up the majority of the freight transported (52.8%).
- the increase in the tonnage of crude materials transported continues to be offset by the decrease in the tonnage of food, feed, beverages and tobacco transported.
- the proportion of fabricated materials transported remained at 27.3%.

Based on the annual report,

- the revenue freight carried by railways within Canada in 1985 (including receipts from Canadian connections), totalled 281.6 million tonnes, a decrease of 1.7% from 1984.
- receipts from Canadian connections totalled 30.5 million tonnes.

Faits saillants

Les faits saillants, en 1985, pour le transport des produits par les principales compagnies ferroviaires sont les suivants:

Sur la base de données mensuelles,

- au Canada le trafic commercial a été 250.6 millions de tonnes en 1985, exclus les inter-connections). Ceci représente une baisse de 1.6% par rapport à 1984.
- les matières brutes constituent toujours le plus grand pourcentage (52.8%) des marchandises transportées.
- l'augmentation du tonnage des matières brutes transportées est toujours compensée par une diminution du tonnage des denrées alimentaires, aliments pour animaux, boissons et tabacs transportés.
- le pourcentage de produits semi-finis transportés reste à 27.3%.

Sur la base des données annuelles,

- le trafic commercial par chemin de fer au Canada a été 281.6 millions de tonnes (incluant les inter-connections) soit une diminution en volume de 1.7% par rapport à 1984.
- les recettes des raccordements canadiens s'élèvent à 30.5 millions de tonnes.

Introduction

This publication brings together under one cover, a summary of statistics on commodities transported by the major railways in Canada during 1985. Prior to 1984, this information was published in two separate annual publications:

- **Railway Freight Traffic** (Catalogue No. 52-205)
- **Railway Transport In Canada: Commodity Statistics** (Catalogue No. 52-211)

Statistics presented in this integrated publication are derived from two surveys conducted by the Transportation Division of Statistics Canada:

- The railway Annual Report – Revenue Freight Carried (Schedule 11) and,
- The monthly survey Railway Transport – Revenue Freight Traffic.

The principal objective for combining the above surveys is to provide total information on the output, size, structure and economic performance of Canada's railway industry. Rail data are also used for the establishment of National economic statistics (such as the Gross National Product and the Gross Domestic Product).

This publication contains commodity information on shipment origins and destinations by province. Statistics by major railways are also provided.

The data are collected in accordance with the provisions of Section 325 of the Railway Act, R.S.C. 1970 c.R-2, and the Statistics Act, Chapter 15, Statutes of Canada 1970-71-72.

Users are encouraged to contact the Transportation Division for additional information and services. A complete list of publications available from the Transportation Division is provided at the back of this publication.

Coverage

Revenue Freight Traffic Statistics

The revenue freight traffic data presented in this publication are obtained from the 21 Class I and Class II common carrier railways operating in Canada.

Cette publication rassemble, le sommaire des données sur les produits transportés par les principales compagnies ferroviaires au Canada en 1985. Avant 1984, ces données étaient publiées dans deux publications annuelles distinctes:

- **Trafic de marchandises ferroviaires** (n° 52-205 au catalogue)
- **Transport ferroviaire au Canada: Statistiques sur les marchandises** (n° 52-211 au catalogue)

Les statistiques présentées dans cette publication intégrée sont tirées des conclusions de deux enquêtes faites par la Division des Transports de Statistique Canada:

- Rapport annuel – Marchandise payante transportée (section 11) et,
- Transport ferroviaire: Trafic des marchandises payantes – (enquête mensuelle).

L'objectif principal de la combinaison de ces deux enquêtes est de donner une information complète sur l'output, la dimension, la structure et les performances économiques de l'industrie ferroviaire au Canada. Ces données sont également utilisées dans le calcul des comptes nationaux.

Cette publication contient des informations sur les origines et destinations des marchandises par province, ainsi que les statistiques des principales compagnies ferroviaires.

Les données sont collectées en vertu de la section 325 de la loi de chemins de fer, RSC 1970 c.R-2, et de la loi sur les statistiques, chapitre 15, Statuts du Canada 1970-71-72.

Pour toute information complémentaire et information au sujet de services disponibles, nous suggérons aux lecteurs de contacter La Division des transports. Le lecteur trouvera à la fin de la présente publication, la liste des publications disponibles à la Division des Transports.

Champ d'observation

Statistique du trafic commercial

Les données du trafic commercial, publiées dans cette publication sont obtenus de 21 compagnies ferroviaires (transporteurs publics) de Classe 1 et 2 opérant au Canada.

These companies are recorded on Statistics Canada's Business Register by a Standard Industrial Classification code (Industry Group 453 – Railway Transport and Related Service Industries). A complete description of the classification system is available from the **Standard Industrial Classification Manual**, 1980 (Catalogue No. 12-501).

Railway Commodity Statistics

Commodity detail is published on the basis of a 320 code structure derived from the Standard Commodity Classification (SCC) of Statistics Canada. A description of the classification system is presented in the **Standard Commodity Classification Manual**, 1972 (Catalogue No. 12-502). The principal criteria employed for SCC grouping are: stage of fabrication; chief component material; and, purpose.

Railway companies within the legislative authority of the Parliament of Canada are classified as follows:

- Class I – Canadian National Railways, Canadian Pacific Limited and Via Rail Canada Inc., and their related operations.
- Class II – Other carriers involved in Canadian rail transportation operations.

Methodology

Data presented in this publication are derived from a mail census of Class I and II common carrier railway companies operating in Canada on forms specified by the Railway Transport Committee of the Canadian Transport Commission and the Transportation Division of Statistics Canada.

Individual reports undergo a comprehensive review by the Transportation Division. Traffic patterns are studied to see if they are consistent with historical trends and carloads are compared against tonnages, on an individual commodity basis, to ensure that the weight reported per car is within acceptable parameters. Also, a reasonability check is performed to ensure that tonnages reported as "loaded in Canada" and the tonnages "received from the United States" agree with the total tonnages "unloaded in Canada" plus amounts "delivered to railways in the United States".

Ces compagnies sont enregistrées sur le registre des entreprises de Statistique Canada par le code de la classification des activités économiques (Groupe Industriel 453 – Industries ferroviaires et Services Connexes). La description du système de Classification est incluse dans le manuel **Classification des activités économiques**, 1980 (n° 12-501 au catalogue).

Statistique sur les produits

Le détail des produits qui est publié sur une base de 320 structure de code est tiré du manuel Classification Type de Produits (CTP) de Statistique Canada. La description du système de classification est présentée dans le manuel **Classification Type de Produits**, 1972 (n° 12-502 au catalogue). Le critère principal employé pour le regroupement par CTP sont les suivants: stage de production; le produit principal de la composition; et, l'objectif.

Les compagnies qui sont sous l'autorité du Parlement Canadien sont classées comme suit:

- Classe I – Le Canadien National, le Canadien Pacifique et Via Rail et leurs opérations connexes.
- Classe II – Les autres transporteurs impliqués dans le transport ferroviaires.

Méthodologie

Les données présentées dans cette publication sont tirées d'un recensement de compagnies ferroviaires de Classe I et II opérant au Canada selon des critères indiqués par le Comité de Transport Ferroviaire de la Commission de Transport du Canada et la Division des Transports de Statistique Canada.

Chaque rapport est étudié très soigneusement par la Division des Transports. Les trafics sont étudiés pour voir s'ils sont conformes aux tendances historiques, les chargements et les tonnages sont comparés par produits afin de s'assurer que le poids par wagon est dans des limites acceptables. Une soigneuse vérification a été aussi faite afin de s'assurer que les tonnages reportés comme "chargés au Canada" et les tonnages "reçus des États-Unis" coïncident avec les tonnages totaux "déchargés au Canada" plus le montant "livrés à des chemins de fer des États-Unis".

Data Quality and Limitations

Users should note the following points concerning railway freight commodity statistics:

1. Most respondents report their data in short tons which are converted to metric tonnes by Statistics Canada.
2. The total volume of freight carried, as shown in the tables in this publication, does not take into account traffic handled in switching services. The latter, involving less than 1% of all tonnage, is included in the "Metric tonnes carried" total in Table 17 of Catalogue No. 52-215, **Railway Transport In Canada – General Statistics**.
3. For piggyback freight, the figures reported include only that portion of traffic where a shipper submitted a trailer or container for shipment by rail. Not included under this heading, are goods submitted by the shipper as "loose merchandise" which the railways chose to move in a railway-owned trailer (or container) on a flat car as opposed to, for example, a box car. Thus, loose merchandise freight is included with various other commodity groups according to the nature of the merchandise involved.

Explanatory Notes

The following notes regarding the data presented in this publication should be considered:

1. **Freight interlined between two-or-more Canadian rail carriers** – is included only once to avoid duplication. Traffic handled in intermediate switching service is excluded.
2. A railway which operates in both Canada and the United States will have all traffic south of the border considered a United States rail connection for the purpose of this publication. Thus, freight crossing the international boundary (whether from or to a non-reporting United States railroad at that point, or carried by one of the respondents reporting in this series), appears as a "receipt from" or "delivery to" a United States rail connection. Certain extensions of Canadian National and Canadian Pacific rail services

Qualité et limites des données

Le lecteur doit noter les points suivants concernant les statistiques de produits transportés par chemin de fer:

1. La plupart des répondants soumettent leurs données en tonne courte que Statistique Canada convertit en tonne métrique.
2. Le volume total de fret transporté, comme l'indiquent les tableaux de cette publication ne prennent pas en compte les trafics de raccordement. Ce dernier, qui représente moins de 1% du tonnage total, est inclus dans le total des "tonnes métriques transportés", tableau 17 du catalogue n° 52-215 **Transport Ferroviaire au Canada – Statistique Canada**.
3. Pour le fret route-rail, les données ne contiennent que la portion du trafic pour laquelle les expéditeurs ont soumis une remorque ou un conteneur pour expédition par rail. Sont exclus de ce sous titre, les marchandises soumises pour les expéditeurs comme "marchandise divers" que les compagnies ferroviaires transportent par leurs propres remorqueurs (ou conteneur) dans un wagon plat par opposition, par exemple, à un wagon couvert. Donc, le fret de marchandises diverses est incluse avec plusieurs autres groupes de produits en accord avec la nature des marchandises impliquées.

Notes explicatives

Les notes suivantes, concernant les données présentées dans cette publication doivent être prises en compte:

1. **Le fret transporté par deux ou plusieurs compagnies ferroviaires canadiennes** – est inclu seulement une fois afin d'éviter le double comptage. Le fret transporté par le service d'aiguillage intermédiaire est exclus.
2. Aux fins de cette publication, une compagnie qui opère au Canada et aux États-Unis aura tout son trafic au sud de la frontière considéré comme une connection ferroviaire au États-Unis. Par conséquent, le fret qui traverse la frontière (qu'il provienne ou qu'il soit destiné à une compagnie ferroviaire américaine non enquêté ou transporté par une firme enquêté dans cette série) apparaît comme un "provenant de" ou "livrées à" à la compagnie ferroviaire américaine. Pour des fins statistiques, certains services ferroviaires du Canadien National et du

in the United States are, for statistical purposes, considered part of the Canadian operations and are included herein. This includes, for the most part, overhead movements (Canada to Canada through the United States) and short rail extensions across the border to connecting United States carriers.

3. Data presented in **Tables 1 and 2** (2.1 – 2.11) are derived from monthly returns regarding Revenue Freight Traffic whereas, **Table 3** shows similar data derived from the Annual Reports. The totals as shown, however, are not identical because year end adjustments have been applied by the respondents.
4. **Table 1** provides a summary of all revenue freight transported by railways within Canada.
5. **Tables 2.1 to 2.11** present data separately for those commodities where the tonnage of revenue freight receiving initial/final rail haul exceeds an arbitrary weight limit. It should be noted that these limits vary from province to province. Other commodities hauled are grouped under the stub heading "All Other". Individual tabulations are available for those commodities included in the "All Other" groups, on a cost recovery basis from the Transportation Division.
6. **Table 3** is derived from the results of the Revenue Freight Carried section of the Annual Report (Schedule 11). Data for eight major railways are shown individually and the statistics for the remaining railways are grouped under Class II "All Other". Freight interlined between railways operating in Canada is also shown in Table 3. These movements are included in the totals for individual companies.
7. Individual items may not add to totals because of rounding.

Canadien Pacifique aux États-Unis sont considérés comme partis intégrantes de leurs opérations canadiennes et traités comme tels. Sont inclus dans ces services, pour la plupart, les mouvements intermédiaires (du Canada au Canada en passant par les États-Unis) et de courts prolongements ferroviaires de l'autre côté de la frontière raccordés à des transporteurs américains.

3. **Les données présentées dans les tableaux 1 et 2** (2.1 – 2.11) sont dérivés des enquêtes mensuelles, Trafic des marchandises payantes alors que le **tableau 3** qui montre des données similaires qui sont tirés des enquêtes annuelles. Cependant, les totaux tels qu'indiqués ne sont pas égaux à cause des ajustements de fin d'année ont été appliqué par les répondants.
4. Le **tableau 1** fournit un sommaire du trafic commercial ferroviaire au Canada.
5. **Les tableaux 2.1 à 2.11** présentent les données séparées de produits dont le tonnage de marchandises payantes, transport initial ou final par chemin de fer dépasse la limite de poids arbitraire – Il convient de noter que ces limites varient d'une province à l'autre. D'autres produits transportés sont groupés sous le sous-titre "Autres". Les totalisations spéciales sont disponibles, pour chacun de ces produits, sur la base de recouvrement des coûts à la Division des Transports.
6. Le **tableau 3** est tiré des résultats de la section Marchandises payantes transportées de l'enquête annuelle (Schedule 11). Les données des huit principales compagnies ferroviaires sont fournies séparément et les données des autres compagnies sont groupées dans Classe II "Autres". Le fret transporté par deux compagnies ou plus au Canada est montré dans le tableau 3. Ces mouvements sont inclus dans les totaux de chaque compagnies.
7. Les items individuels ne sont pas ajoutés aux totaux à cause des données arrondies.

Definitions

Respondents are advised to use the following definitions when completing their reports:

"Common carrier" – a railway which offers its services to the general public to transport goods and/or passengers for compensation.

"Delivered to United States rail" – traffic delivered to United States rail connections or transported across the border by the respondent.

"Deliveries to other railways in Canada" – traffic delivered directly to connecting Canadian rail carriers and deliveries to other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a subsequent rail haul is indicated.

"Intermediate switching" – a switching service which includes all the elements of switching performed by a carrier which neither originates or terminates the shipment nor receives a line haul on that shipment.

"Line haul" – the movement of trains between terminals and stations on the main or branch lines of the road, exclusive of switching movements.

"Loaded" – revenue freight originated directly on the track belonging to the respondent, including that received from private, non-reporting industrial sidings; freight received from switching roads connecting with the respondent where such freight has not previously been given line haul transportation; freight received from other modes of transport; freight re-shipped following milling or fabrication at some point in transit; and, idler or trailer cars.

"Received from other railways in Canada" – traffic received directly from connecting Canadian rail carriers and receipts from other modes of transport (other than car ferries) when these move at joint rates on through billing, or when a previous rail haul is indicated.

Définitions

Les répondants sont invités à utiliser les définitions suivantes lorsqu'ils remplissent leurs questionnaires:

"Société ferroviaire publique" – est une société qui offre au grand public un service de transport de marchandise et/ou de passagers contre rétribution.

"Livrées à des chemins de fer des États-Unis" – Les marchandises livrées à des raccordements ferroviaires ou transportées au delà de la frontière par l'enquête.

"Livrées à des chemins de fer du Canada" – marchandises livrées directement à des raccordements ferroviaires et marchandises livrées à d'autres modes de transport (autre que les traversiers d'automobiles) lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un autre transport ferroviaire subséquent est indiqué.

"L'aiguillage intermédiaire" – est un service qui comprend toutes activités d'aiguillage exercées par un transporteur autre que le premier ou le dernier transporteur et qui ne s'occupe pas du transport interurbain de cette marchandise.

"Transport ferroviaire" – Déplacement de trains entre les terminus et les gares sur les voies principales ou les embranchements du chemin de fer, sauf l'aiguillage.

"Chargées" – le transport commercial de marchandises effectué directement sur une ligne de l'enquête, y compris les marchandises provenant d'embranchements privés non enquêtés; marchandises provenant de voies d'aiguillage reliées à celle de l'enquête lorsque les marchandises n'ont pas déjà fait l'objet d'un transport proprement dit; marchandises provenant d'autres modes de transport; marchandises réexpédiées après usinage ou transformation en cours de route; et wagons-allonges.

"Provenant d'autres sociétés ferroviaires au Canada" – marchandises provenant directement de raccordements ferroviaires canadiens et provenant d'autres modes de transport (autres que les traversiers d'automobiles), lorsque celles-ci sont acheminées à tarif conjoint jusqu'à destination ou lorsqu'un transport ferroviaire antérieur est indiqué.

"Received from United States rail destined to Canadian points" – traffic received from United States rail connecting, or transported across the border by the respondent, destined to Canadian points.

"Received from United States rail destined to United States points" – freight moving from United States rail connections to points in the United States (i.e. overhead traffic).

"Unloaded" – freight terminated directly on the road of the respondent. It includes: freight delivered to private, non-reporting industrial sidings and grain unloaded at interior, lake and coastal elevators for export; freight delivered to switching roads connecting with the respondent where there is no further line haul; freight delivered to other modes of transport; and, freight unloaded for milling or fabrication at some point in transit.

"Provenant de voies des États-Unis et destinées à des localités canadiennes" – marchandises, provenant de raccordements ferroviaires américains ou transportées de ce côté-ci de la frontière par l'enquête et destinées à des localités canadiennes.

"Provenant de voies des États-Unis et destinées à des localités américaines" – marchandises passant de raccordements ferroviaires des États-Unis à des localités des États-Unis (trafic intermédiaire).

"Déchargées" – marchandises livrées directement à partir d'une ligne de l'enquête, y compris celles livrées à des embranchements privés non enquêtés et les céréales déchargées à des élévateurs intérieurs, à des élévateurs sur les lacs et sur la côte en vue de l'exportation; marchandises livrées à des voies d'aiguillage reliées à celles de l'enquête au point où à partir duquel plus aucun transport n'a eu lieu; marchandises livrées à d'autres modes de transport; et marchandises déchargées en vue de la transformation ou de l'usinage en cours de route.

45 Delivered to United States rail points	"	17 264 320	12 707 565	-	15 966	1 953 316

(1) Includes all traffic carried by each individual railway. Traffic received from other railways in Canada will thus also be included in the totals for one or more other railways.

(2) Excludes railways owned (plan II) trailers and containers for which data are included under appropriate commodities according to trailer or container contents.

TABEAU 3 : Marchandises Payantes Transportées par Chemin de Fer au Canada, 1985
Les marchandises dont le poids est de 100000 tonnes et plus sont montrées séparément

CLASS II - CLASSE II				Grand total all railways	Type de marchandise	No	
Toronto Hamilton and Buffalo	Ontario Northland	Quebec North Shore and Labrador	All others	Total général tout che- mins de fer

(1) Comprend l'ensemble du trafic marchandises effectué par chaque société ferroviaire individuelle. Les marchandises provenant d'autres sociétés ferroviaires du Canada seront ainsi également incluses dans les totaux pour une société ferroviaire ou plus.

(2) Non compris les remorques et conteneurs qui sont la propriété des compagnies ferroviaires (plan II) et dont le fret a été classé par type de marchandise suivant le contenu de la remorque ou conteneur.

Did You Know

... That the Transportation Division collects operating statistics and origin-destination data for the trucking, bus, marine, rail and air transport industries?

... That the Transportation Division can provide special tabulations and analytical studies tailored to your business needs on a cost recovery basis?

... That you can obtain free of charge a catalogue describing the contents of the Transportation Division publications listed at the back of this book?

Find out how the Transportation Division can help you meet your information needs by writing to:

Ellis Drover, Director
Transportation Division
Statistics Canada
2nd Floor, Main Bldg.
Tunney's Pasture
Ottawa
K1A 0T6

or by telephoning:

Bill Penner
Chief, Surface & Marine Section
(613) 991-2527

Denis Chartrand
Chief, Aviation Section
(819) 997-6942

Saviez-vous

... que la Division des transports recueille des données sur l'exploitation des entreprises de transport par camion, autobus, bateau, train et avion ainsi que sur les points d'origine et de destination?

... que la Division des transports peut, sur demande et contre recouvrement des frais, effectuer des totalisations spéciales et des études analytiques qui répondent aux besoins spécifiques de votre entreprise?

... que vous pouvez obtenir gratuitement un catalogue descriptif des publications de la Division des transports figurant sur la couverture arrière intérieure de la présente publication?

La Division des transports peut vous aider à combler vos besoins en information. Pour en savoir davantage, écrivez à:

M. Ellis Drover, directeur
Division des transports
Statistique Canada
2e étage, immeuble Principal
Parc Tunney
Ottawa
K1A 0T6

ou téléphonez à l'une des personnes suivantes:

M. Bill Penner
Chef, Section des transports de surface et maritimes
613-991-2527

M. Denis Chartand
Chef, Centre des statistiques de l'aviation
819-997-6942
